CONTENTS

Preface v

CHAPTER 1. BASIC CONCEPTS AND RESULTS 1

0. Notation and preliminaries 1
1. First variation of arc length 4
2. Exponential map and normal coordinates 7
3. The Hopf–Rinow Theorem 11
4. The curvature tensor and Jacobi fields 13
5. Conjugate points 17
6. Second variation of arc length 20
7. Submanifolds and the second fundamental form 22
8. Basic index lemmas 24
9. Ricci curvature and Myers' and Bonnet's Theorems 27
10. Rauch Comparison Theorems 29
11. The Cartan–Hadamard Theorem 35
12. The Cartan–Ambrose–Hicks Theorem 37
13. Spaces of constant curvature 40

CHAPTER 2. TOPONOGOV'S THEOREM 42

CHAPTER 3. HOMOGENEOUS SPACES 55

CHAPTER 4. MORSE THEORY 80

CHAPTER 5. CLOSED GEODESICS AND THE CUT LOCUS 93

CHAPTER 6. THE SPHERE THEOREM AND ITS GENERALIZATIONS 106

CHAPTER 7. THE DIFFERENTIABLE SPHERE THEOREM 118

CHAPTER 8. COMPLETE MANIFOLDS OF NONNEGATIVE CURVATURE . . 134

CHAPTER 9. COMPACT MANIFOLDS OF NONPOSITIVE CURVATURE . . . 154

BIBLIOGRAPHY 169

INDEX 173
