

## CONTENTS

<b>Chapter I.</b>	<b>Introduction . . . . .</b>	<b>1</b>
<b>Chapter II.</b>	<b>Preliminaries</b>	
	§1. Topology . . . . .	6
	§2. Homotopy Theory . . . . .	8
	§3. Category Theory . . . . .	11
<b>Chapter III.</b>	<b>The Shape Category</b>	
	§1. Definition of the Shape Category . . . . .	20
	§2. Some properties of the shape category and the shape functor . . . . .	26
	§3. Representation of shape morphisms . . . . .	30
	§4. Borsuk's approach to shape theory . . . . .	32
	§5. Chapman's Complement Theorem . . . . .	36
<b>Chapter IV.</b>	<b>General Properties of the Shape Category and the Shape Functor</b>	
	§1. Continuity . . . . .	47
	§2. Inverse Limits in the Shape Category . . . . .	51
	§3. Fox's Theorem in Shape Theory . . . . .	53
	§4. Shape Properties of Some Decomposition Spaces .	56
	§5. Space of Components . . . . .	60
<b>Chapter V.</b>	<b>Shape Invariants</b>	
	§1. Čech homology, cohomology, and homotopy pro-groups . . . . .	64
	§2. Movability and n-movability . . . . .	64
	§3. Deformation Dimension . . . . .	68
	§4. Shape retracts . . . . .	74
<b>Chapter VI.</b>	<b>Algebraic Properties Associated with Shape Theory</b>	
	§1. The Mittag-Leffler condition and the use of $\lim_{\leftarrow}^1$ . . . . .	77
	§2. Homotopy idempotents . . . . .	81
<b>Chapter VII.</b>	<b>Pointed 1-movability</b>	
	§1. Definition of pointed 1-movable continua and their properties . . . . .	88
	§2. Representation of pointed 1-movable continua .	93
	§3. Pointed 1-movability on curves . . . . .	98
<b>Chapter VIII.</b>	<b>Whitehead and Hurewicz Theorems in Shape Theory</b>	
	§1. Preliminary results . . . . .	103
	§2. The Whitehead Theorem in shape theory . . . . .	106
	§3. The Hurewicz Theorem in shape theory . . . . .	109
<b>Chapter IX.</b>	<b>Characterizations and Properties of Pointed ANSR's</b>	
	§1. Preliminary results . . . . .	111
	§2. Characterizations of pointed ANSR's . . . . .	114

§3.	The Union Theorem for ANSR's . . . . .	116
§4.	ANR-divisors . . . . .	119
Chapter X.	Cell-like Maps	
§1.	Preliminary definitions and results . . . . .	123
§2.	The Smale Theorem in shape theory . . . . .	127
§3.	Examples of cell-like maps which are not shape equivalences . . . . .	129
§4.	Hereditary shape equivalences . . . . .	132
Chapter XI.	Some Open Problems . . . . .	141
Bibliography . . . . .		143
List of Symbols . . . . .		148
Index . . . . .		150
