CONTENTS

Preface v

CHAPTER 1. DIMENSION THEORY OF SEPARABLE METRIC SPACES . . . 1

1.1. Definition of the small inductive dimension 3
1.2. The separation and enlargement theorems for dimension 0 10
1.3. The sum, Cartesian product, universal space, compactification and embedding theorems for dimension 0 20
1.4. Various kinds of disconnectedness 31
1.5. The sum, decomposition, addition, enlargement, separation and Cartesian product theorems 41
1.6. Definitions of the large inductive dimension and the covering dimension. Metric dimension 51
1.7. The compactification and coincidence theorems. Characterization of dimension in terms of partitions 60
1.8. Dimensional properties of Euclidean spaces and the Hilbert cube. Infinite-dimensional spaces 71
1.9. Characterization of dimension in terms of mappings to spheres. Cantor-manifolds. Cohomological dimension . . 87
1.10. Characterization of dimension in terms of mappings to polyhedra 99
1.11. The embedding and universal space theorems 118
1.12. Dimension and mappings 133
1.13. Dimension and inverse sequences of polyhedra 143
1.14. Dimension and axioms 154

CHAPTER 2. THE LARGE INDUCTIVE DIMENSION 161

2.1. Hereditarily normal and strongly hereditarily normal spaces 162
2.2. Basic properties of the dimension Ind in normal and hereditarily normal spaces 170

2.3. Basic properties of the dimension Ind in strongly hereditarily normal spaces 182
2.4. Relations between the dimensions ind and Ind. Cartesian product theorems for the dimension Ind 197

CHAPTER 3. THE COVERING DIMENSION 207

3.1. Basic properties of the dimension dim in normal spaces. Relations between the dimensions ind, Ind and dim 208
3.2. Characterizations of the dimension dim in normal spaces. Cartesian product theorems for the dimension dim 226
3.3. The compactification and the universal space theorems for the dimension dim. The dimension dim and inverse systems of compact spaces 241

CHAPTER 4. DIMENSION THEORY OF METRIZABLE SPACES 251

4.1. Basic properties of dimension in metrizable spaces 252
4.2. Characterizations of dimension in metrizable spaces. The universal space theorem 267
4.3. Dimension and mappings in metrizable spaces 277
