

TABLE OF CONTENTS

PREFACE	v
CHAPTER 0 : A REVIEW OF K - THEORY	1
CHAPTER 1 : THE HOPF INVARIANT	13
1. Introduction	13
2. The Hopf Invariant of Maps from S^3 onto S^2	14
3. The Hopf Invariant of Maps $f : S^{2n-1} \rightarrow S^n$	25
4. Cohomological Interpretation of the Hopf Invariant	30
5. K - Theoretical Solution of the Hopf Invariant One Problem and Applications	36
CHAPTER 2 : TORSION FREE H - SPACES OF RANK TWO	43
1. Introduction	43
2. Hopf Construction, projective Plane and Type of Torsion free Rank two H - spaces	46
3. Torsion free H - spaces of Type (3,7)	54
4. The Homotopy Type Classification	63
5. K - Theoretical Proof of the Type Classification Theorem	72
CHAPTER 3 : HOMOTOPY AND STABLY COMPLEX STRUCTURE	81
1. The Question of Complex Structure	81
2. Almost Complex Manifolds and Stably Complex Manifolds	83
3. The Homotopy Type of M and \tilde{M}	87
4. The manifold \tilde{M} is not stably complex	90
CHAPTER 4 : VECTOR FIELDS ON SPHERES	93
1. Introduction	93
2. Vector Fields and Sphere Bundles over Projective Spaces	97

3. The K - Theory of the projective Spaces	106
4. Real Vector Fields on Spheres	119
5. Cross-Sections of Complex Stiefel Fibrations	123
6. Cross-Sections of Quaternionic Stiefel Fibrations	130
CHAPTER 5 : SPAN OF SPHERICAL FORMS	139
1. Introduction and Generalities about Spherical Forms	139
2. Vector Fields on Spherical Forms	146
3. G - Fibre Homotopy J - Equivalence	152
4. G - (Co) Reducibility	160
5. Span of Spherical Forms of Cyclic Type	168
6. Span of Spherical Forms of Quaternionic Type	173
CHAPTER 6 : IMMERSIONS AND EMBEDDINGS OF MANIFOLDS	177
1. Background	177
2. A brief Historical Survey	182
3. Atiyah's Criterion	188
4. About Immersions and Embeddings of Lens Spaces	198
5. The Case of the Q_m - Spherical Forms	206
6. Parallelizability of the Spherical Forms	212
7. Immersions of Complex Projective Spaces	217
CHAPTER 7 : GROUP HOMOMORPHISMS AND MAPS BETWEEN CLASSIFYING SPACES; VECTOR BUNDLES OVER SUSPENSIONS	225
1. Generalities	225
2. Cartan-Serre-Whitehead Towers and H - Spaces	226
3. Remarks about the KU - Theory of certain Classifying Spaces	229
4. A Theorem of Non-Surjectivity for $\alpha_{G,H}$	232
5. Vector Bundles over Suspensions	234
CHAPTER 8 : ON THE INDEX THEOREM OF ELLIPTIC OPERATORS	239
1. Introduction	239
2. The Index of an Elliptic Differential Operator	244
3. Four Standard Complexes	254

Table of Contents

ix

4. The Index Theorem	267
5. The Generalized Lefschetz Fixed-Point Formula	281
BIBLIOGRAPHY	295
INDEX	315
