PREFACE	iii
1. INTRODUCTION: RIEMANNIAN THEMES IN LORENTZIAN GEOMETRY	1
2. LORENTZIAN MANIFOLDS AND CAUSALITY	15
2.1 Lorentzian Manifolds and Convex Normal Neighborhoods	16
2.2 Causality Theory of Space-times	21
2.3 Limit Curves and the C^0 Topology on Curves	33
2.4 Two-dimensional Space-times	45
2.5 The Second Fundamental Form	53
2.6 Warped Products	55
3. LORENTZIAN DISTANCE	81
3.1 Basic Concepts and Definitions	81
3.2 Distance-preserving and Homothetic Maps	94
3.3 The Lorentzian Distance Function and Causality	101
4. EXAMPLES OF SPACE-TIMES	113
4.1 Minkowski Space-time	115
4.2 Schwarzschild and Kerr Space-times	120
4.3 Spaces of Constant Curvature	123
4.4 Robertson-Walker Space-times	126
4.5 Bi-invariant Lorentzian Metrics on Lie Groups	132
5. COMPLETENESS AND EXTENDIBILITY	139
5.1 Existence of Maximal Geodesic Segments	141
5.2 Geodesic Completeness	144
5.3 Metric Completeness	152
5.4 Ideal Boundaries	155
5.5 Local Extensions	159
5.6 Curvature Singularities	165

6.	STABILITY OF ROBERTSON-WALKER SPACE-TIMES	171
6.1	Stable Properties of $Lor(M)$ and $Con(M)$	173
6.2	The C^1 Topology and Geodesic Systems	175
6.3	Stability of Geodesic Incompleteness for Robertson-Walker Space-times	179
7.	MAXIMAL GEODESICS AND CAUSALLY DISCONNECTED SPACE-TIMES	195
7.1	Almost Maximal Curves and Maximal Geodesics	197
7.2	Nonspacelike Geodesic Rays in Strongly Causal Space-times	204
7.3	Causally Disconnected Space-times and Nonspacelike Geodesic Lines	207
8.	THE LORENTZIAN CUT LOCUS	219
8.1	The Timelike Cut Locus	222
8.2	The Null Cut Locus	230
8.3	The Nonspacelike Cut Locus	237
9.	MORSE INDEX THEORY ON LORENTZIAN MANIFOLDS	245
9.1	The Timelike Morse Index Theory	249
9.2	The Timelike Path Space of a Globally Hyperbolic Space-time	279
9.3	The Null Morse Index Theory	292
10.	SOME RESULTS IN GLOBAL LORENTZIAN GEOMETRY	327
10.1	The Timelike Diameter	329
10.2	Lorentzian Comparison Theorems	334
10.3	Lorentzian Hadamard-Cartan Theorems	340
11.	SINGULARITIES	345
11.1	Jacobi Tensors	346
11.2	The Generic and Strong Energy Conditions	353
11.3	Focal Points	366
11.4	The Existence of Singularities	389
11.5	Smooth Boundaries	396
	APPENDIXES	401
	A. Connections and Curvature	401
	B. The Generic Condition	413
	C. The Einstein Equations	421
	D. Jacobi Fields and Toponogov's Theorem for Lorentzian Manifolds <i>by Steven G. Harris</i>	427
	REFERENCES	435
	NOTATION	447
	INDEX	453
