

## CONTENTS

Preface .....	v
Topological Equivalence of Non-Separable Reflexive Banach Spaces by C. Bessaga .....	3
On Topological Classification of Non-Separable Banach Spaces by C. Bessaga and M. I. Kadec .....	15
On Homotopy Properties of Compact Subsets of the Hilbert Space by Karel Borsuk .....	25
Some Thin Sets in Fréchet Spaces by H. H. Corson .....	37
A Remark on Banach Analytic Spaces by A. Douady .....	41
Fibring Spaces of Maps by James Eells, Jr. ....	43
An Approximate Morse-Sard Theorem by James Eells and John McAlpin .....	59
Morse Theory for Closed Curves by Halldor I. Eliasson .....	63
Covering Properties of Convex Sets and Fixed Point Theorems in Topological Vector Spaces by Ky Fan .....	79
On the Cohomology Theory in Linear Normed Spaces by Kazimierz Geba and Andrzej Granas .....	93

Analyse de la Technique de Nash-Moser by G. Glaeser (Rennes) .....	107
Generalizing the Hopf-Lefschetz Fixed Point Theorem for Non-Compact ANR-S by Andrzej Granas .....	119
Some Questions in the Dimension Theory of Infinite Dimensional Spaces by David W. Henderson .....	131
On the Continuity of Best Approximation Operators by R. B. Holmes .....	137
Some Self-Dual Properties of Normed Linear Spaces by Robert C. James .....	159
Asymptotic Fixed Point Theory by G. Stephen Jones .....	177
On the Relationship of Local to Global Fixed-Point Indexes by Ronald J. Knill .....	185
$C^1$ -Equivalence of Functions Near Isolated Critical Points by Nicolaas H. Kuiper .....	199
Fixed Point Index and Lefschetz Number by Jean Leray .....	219
Weakly Compact Sets – Their Topological Properties and the Banach Spaces They Generate by Joram Lindenstrauss .....	235
On Continuity and Approximation Questions Concerning Critical Morse Groups in Hilbert Space by E. H. Rothe .....	275
On Homeomorphisms of Certain Infinite Dimensional Spaces by Raymond Y. T. Wong .....	297
