Introduction 1

Chapter 1: *Bordism Groups*

1.	Equivariant bordism groups	5
2.	Slice types	7
3.	Bordism with families of G slice types	9
4.	Reinterpretation of certain bordism groups	14
5.	Reinterpretation of the bundle bordism groups	17
6.	Irreducible G modules	19
7.	Splitting homomorphisms	24
8.	Surgery	31
9.	Historical note	45

Chapter 2: *Cutting and Pasting Groups*

1.	The SK groups	47
2.	Equivariant SK groups	48
3.	Bordism and SK equivalence	52
4.	Fibrations and SK equivalence	56
5.	Calculation of SK_*	60
6.	Splitting homomorphisms	62
7.	Bordism and splittings	66
8.	Historical note	69

Chapter 3: Classifying Spaces

1. Bordism and cohomology 70
2. Simplification of $\Gamma(H; U)$ 71
3. Cohomology of $B\Gamma$ 80
4. Generators of $N_*(B\Gamma)$ 98
5. Calculation of $SK_*(B\Gamma)$ 114
6. Historical note 114

Chapter 4: Generators of the Equivariant Bordism Groups

1. Generators for G bordism, G odd order 116
2. Generators for $\mathbb{Z}/2$ bordism 117
3. Generators for $\mathbb{Z}/4$ bordism 120
4. Generators for $\mathbb{Z}/2^r$ bordism 132
5. $(\mathbb{Z}/2)^k$ bordism - algebraic results 145
6. Generators of $(\mathbb{Z}/2)^k$ bordism 173
7. Generators for G bordism, G general 180
8. Generators of S^1 bordism 187
9. Historical note 194

*Chapter 5: Generators of the Equivariant
Cutting and Pasting Groups*

1. A general remark. 196
 2. Generators of $SK_*^G; G$ of odd order 197
 3. Generators of $SK_*^{\mathbb{Z}/2}$ 200
 4. Generators of $SK_*^{\mathbb{Z}/4}$ 207
 5. Generators of $SK_*^G; G = \mathbb{Z}/2^r$ 215
 6. Generators for $SK_*^G; G = (\mathbb{Z}/2)^k$ 217
 7. Generators for $SK_*^G; G$ general 220
