

Contents

<i>Chapter 1. Basic Concepts</i>	1
1. The Antiderivative and the Indefinite Integral	1
2. Some Key Integrals	10
3. Simple Rules of Integration	12
4. Integration by Change of Variables	19
5. Integration by Parts	31
<i>Chapter 2. Integration of Rational Expressions</i>	40
6. Preliminary Remarks	40
7. Partial Fractions and Their Integrals	41
8. Expansion in Partial Fractions	44
9. The Ostrogradski-Hermite Formula	56
<i>Chapter 3. Integration of Irrational Expressions</i>	66
10. Integrals of the Form $\int R\left(x, \sqrt[m]{\frac{\alpha x + \beta}{\gamma x + \delta}}\right) dx$	66
11. Integrals of the Form $\int x^m (a + bx^n)^p dx$	68
12. Integrals of the Form $\int R(x, \sqrt{ax^2 + bx + c}) dx$	76
13. More on Integrals of the Form $\int R(x, \sqrt{ax^2 + bx + c}) dx$	91
<i>Chapter 4. Integration of Trigonometric Expressions</i>	105
14. Integrals of the Form $\int R(\sin x, \cos x) dx$	105
15. Integrals of the Form $\int \cos^u x \sin^v x dx$	114
16. Some Integrals Involving e^{ax}	120
<i>Appendix. Elliptic Integrals</i>	124
<i>Index</i>	139
