

CONTENTS

§1. <u>INTRODUCTION</u>	1
§2. <u>BACKGROUND</u>	4
§2.1 Pro - Categories	4
§2.2 Some useful categories	9
§2.3 Model categories	41
§2.4 Simplicial closed model categories	48
§2.5 Homotopy theories of pro - spaces	53
§3. <u>THE MODEL STRUCTURE ON PRO - SPACES</u>	56
§3.1 Introduction	56
§3.2 The homotopy theory of C^J	57
§3.3 The homotopy theory of pro - C	71
§3.4 Suspension and loop functors, cofibration and fibration sequences	94
§3.5 Simplicial model structures	107
§3.6 Pairs	113
§3.7 Geometric Models	115
§3.8 Inj - spaces	125

§4.	<u>THE HOMOTOPY INVERSE LIMIT AND ITS APPLICATIONS TO</u>	
	<u>HOMOLOGICAL ALGEBRA</u>	129
§4.1	Introduction	129
§4.2	The homotopy inverse limit	130
§4.3	Ex^∞ on pro-SS	134
§4.4	The derived functors of the inverse limit: background . . .	139
§4.5	Results on derived functors of the inverse limit	143
§4.6	Algebraic description of \lim^S	145
§4.7	Topological description of \lim^S	152
§4.8	Strongly Mittag-Leffler pro-groups	162
§4.9	The Bousfield-Kan spectral sequence	166
§4.10	Homotopy direct limits	169
§5.	<u>THE ALGEBRAIC TOPOLOGY OF pro-C</u>	172
§5.1	Introduction	172
§5.2	$\text{Ho}(\text{tow}-C_*)$ versus $\text{tow}-\text{Ho}(C_*)$	172
§5.3	Remarks on completions	181
§5.4	Some basic functors	184
§5.5	Whitehead and Stability Theorems	187
§5.6	Strong homotopy and homology theories	206

56.	<u>PROPER HOMOTOPY THEORY</u>	213
§6.1	Introduction	213
§6.2	Proper homotopy and ends	214
§6.3	Proper homotopy theory of σ -compact spaces	220
§6.4	Whitehead-type theorems	225
§6.5	The Chapman Complement Theorem	228
57.	<u>GROUP ACTIONS ON INFINITE DIMENSIONAL MANIFOLDS</u>	233
§7.1	Introduction	233
§7.2	The theory of s -manifolds and Q -manifolds	233
§7.3	The Standard Actions	237
§7.4	Proof of Theorem (7.3.4)	240
58.	<u>STEENROD HOMOTOPY THEORY</u>	245
§8.1	Introduction	245
§8.2	Steenrod homology theories	246
§8.3	The Vietoris functor	254
§8.4	Proofs of Theorems (8.2.19), (8.2.20) and (8.2.21)	268
§8.5	Spectral sequences	269
§8.6	Duality	276
59.	<u>SOME OPEN QUESTIONS</u>	279
	<u>REFERENCES</u>	281
	<u>INDEX</u>	294
