| GENERAL PREFACE | <i>page xv</i> |
| PREFACE TO VOLUME I | xvii |
| REFERENCES AND ABBREVIATIONS | xix |
| CHAPTER I. REVIEW OF SOME FACTS, DEFINITIONS AND METHODS | 1 |
| 1.1 Numbers, variables and functions | 1 |
| 1.11 Numbers, p. 1. 1.12 Constants and variables, p. 3. | |
| 1.13 Functions, p. 3. 1.14 The function $ x $, p. 5 | |
| 1.2 Simple inequalities | 6 |
| 1.21 Fundamental results, p. 6. 1.22 Arithmetic, geometric, and harmonic means, p. 8 | |
| Exercise 1(<i>a</i>) | 10 |
| 1.3 Quadratic functions and quadratic inequalities | 11 |
| 1.31 Sign of a quadratic function, p. 11. 1.32 Cauchy's inequality, p. 14 | |
| Exercise 1(<i>b</i>) | 14 |
| 1.4 Graphs | 15 |
| 1.41, 1.42 Examples, pp. 15, 19 | |
| Exercise 1(<i>c</i>) | 19 |
| 1.5 Types of function | 20 |
| 1.51 Classification by structure, p. 20. 1.52 Classification by properties, p. 22. 1.53 Inadequacy of graphical representation, p. 27 | |
| Exercise 1(<i>d</i>) | 29 |
| 1.6 Plane curves | 30 |
| 1.61 Parametric equations, p. 30. 1.62 Polar coordinates, p. 31 | |
| 1.63 Polar equation of a curve, p. 32 | |
| Exercise 1(<i>e</i>) | 34 |
| Miscellaneous Exercise 1(<i>f</i>) | 35 |

| | |
|--|----------------|
| CHAPTER 2. LIMITS. CONTINUOUS FUNCTIONS | <i>page</i> 38 |
| 2.1 Limits: some examples from previous work | 38 |
| 2.11 dy/dx , p. 38. 2.12 $\sin x/x$, p. 38. 2.13, 2.14 Other examples, p. 39. 2.15 Tangent, p. 40 | |
| 2.2 The general idea of a limit | 40 |
| 2.21 Informal definition, p. 40. 2.22 Formal definition, p. 41 | |
| 2.3 Some general properties of limits | 41 |
| 2.4 Other ways in which a function can behave | 43 |
| 2.5 Limits when $x \rightarrow \infty$, $x \rightarrow -\infty$ | 45 |
| 2.6 Continuity | 45 |
| 2.61 Definition of 'continuous function', p. 45. 2.62 Some properties of continuous functions, p. 47. 2.63 Examples of some continuous functions, p. 47. 2.64 Removable discontinuities, p. 48. 2.65 Another property of continuous functions, p. 48 | |
| Exercise 2(<i>a</i>) | 50 |
| 2.7 Functions of n : some important limits | 50 |
| 2.71 Sequences, p. 50. 2.72 a^n , p. 52. 2.73 a^n/n , p. 53. 2.74 $a^n/n!$, p. 54. 2.75 $m(m-1)\dots(m-n+1)a^n/n!$, m constant, p. 54. 2.76 Further examples, p. 55. 2.77 Monotonic functions, p. 55 | |
| Exercise 2(<i>b</i>) | 58 |
| Miscellaneous Exercise 2(<i>c</i>) | 58 |
| CHAPTER 3. THE DERIVATIVE. SOME APPLICATIONS | 60 |
| 3.1 The derivative of a function of one variable | 60 |
| 3.11 Definitions, p. 60. 3.12 A derivable function is continuous, p. 61 | |
| 3.2 The rules of derivation | 62 |
| Sum, product, quotient; function of a function; inverse functions | |
| 3.3 Derivatives of some well-known functions | 65 |
| 3.31 x^n , p. 65. 3.32 The circular functions, p. 66. 3.33 The inverse circular functions, p. 66 | |
| 3.4 Implicit functions and functions defined parametrically | 67 |
| 3.41 Derivative of a function defined implicitly, p. 67. 3.42 Derivative of a function defined parametrically, p. 68 | |
| Exercise 3(<i>a</i>) | 68 |

| | | |
|------------------------|---|---------|
| 3.5 | Derivatives of second and higher orders | page 70 |
| | 3.51 Notation, p. 70. 3.52 Implications of the existence of $f^{(n)}(a)$, $n > 1$, p. 71. 3.53 Examples, p. 71 | |
| | Exercise 3(b) | 73 |
| 3.6 | Increasing and decreasing functions; maxima and minima | 74 |
| | 3.61 Function increasing or decreasing at a point, p. 74. | |
| | 3.62 Definition of 'maximum', 'minimum', p. 74. 3.63 If $f(x)$ is derivable at a maximum or minimum, then $f'(x) = 0$ there, p. 76. 3.64 'Change of sign' test, p. 77. 3.65 'Second derivative' test, p. 77. 3.66 Examples, p. 78 | |
| 3.7 | Points of inflexion of a curve | 80 |
| | 3.71 Definition and determination, p. 80. 3.72 Summary, p. 81 | |
| 3.8 | A theorem suggested geometrically | 81 |
| | 3.81 The mean value theorem, p. 81. 3.82 $f'(x) = 0$ and constancy of $f(x)$, p. 82. 3.83 Function increasing or decreasing throughout an interval, p. 83 | |
| | Exercise 3(c) | 84 |
| 3.9 | Small changes. Differentials | 85 |
| | 3.91 Small changes, p. 85. 3.92 Differentials, p. 87. | |
| | 3.93 Differentiable functions, p. 89 | |
| | Exercise 3(d) | 87 |
| | Miscellaneous Exercise 3(e) | 90 |
| CHAPTER 4. INTEGRATION | | 93 |
| | (A) <i>Methods of integration. The logarithmic, exponential and hyperbolic functions</i> | 93 |
| 4.1 | The process inverse to derivation | 93 |
| | 4.11 The problem, p. 93. 4.12 Some standard integrals, p. 94. | |
| | 4.13 Some properties of indefinite integrals, p. 94. 4.14 Areas, p. 95. 4.15 Definite integrals; some properties, p. 96. | |
| | 4.16 Criticism, p. 98 | |
| | Exercise 4(a) | 99 |
| 4.2 | Some general methods of integration | 100 |
| | 4.21 Integration by substitution (change of variable), p. 100. | |
| | 4.22 Definite integrals by substitution, p. 102. 4.23 Integration by parts, p. 105. 4.24 Reduction formulae, p. 107. 4.25 Definite integrals by parts and reduction, p. 108 | |
| | Exercise 4(b) | 104 |
| | Exercise 4(c) | 109 |

| | | |
|------------|--|-----------------|
| 4.3 | The logarithmic function | <i>page</i> 109 |
| | 4.31 The integral $\int dx/x$, p. 109. 4.32 Investigation of $\phi(t)$, p. 110. 4.33 An application to integration, p. 114 | |
| | Exercise 4 (<i>d</i>) | 114 |
| 4.4 | The exponential and hyperbolic functions | 116 |
| | 4.41 The exponential function, p. 116. 4.42 Logarithmic derivation, p. 120. 4.43 The logarithmic inequality. Some important limits ($\log x/x$, $x \log x$, x^m/e^x , $(1+x/n)^n$, Euler's constant γ), p. 121. 4.44 The hyperbolic functions, p. 125. 4.45 The inverse hyperbolic functions, p. 130 | |
| | Exercise 4 (<i>e</i>) | 119 |
| | Exercise 4 (<i>f</i>) | 124 |
| | Exercise 4 (<i>g</i>) | 128 |
| | Exercise 4 (<i>h</i>) | 132 |
| | (B) <i>Systematic integration</i> | 134 |
| 4.5 | Revised list of standard integrals | 134 |
| 4.6 | Integration of rational functions | 136 |
| | 4.61 Preliminary considerations, p. 136. 4.62 Digression on partial fractions, p. 136. 4.63 Summary, p. 141. 4.64 $\int (Ax+B)dx/(x^2+bx+c)$, p. 142. 4.65 Reduction formula for $\int (Ax+B)dx/(x^2+bx+c)^n$, p. 144 | |
| | Exercise 4 (<i>i</i>) | 141 |
| | Exercise 4 (<i>j</i>) | 145 |
| 4.7 | Integration of some algebraical functions | 145 |
| | 4.71 Linear irrationalities, p. 145. 4.72 Quadratic irrationalities, p. 146. 4.73 $\int (Ax+B)dx/\sqrt{(ax^2+bx+c)}$, p. 147. 4.74 $\int dx/(x-k)\sqrt{(ax^2+bx+c)}$, p. 149. 4.75 $\int \sqrt{(ax^2+bx+c)}dx$, p. 149. 4.76 Direct use of a trigonometric or hyperbolic substitution, p. 150 | |
| | Exercise 4 (<i>k</i>) | 150 |
| 4.8 | Integration of some transcendental functions | 151 |
| | 4.81 Rational functions of $\sin x$, $\cos x$, p. 151. 4.82 Circular functions of multiple angles, p. 154. 4.83 Hyperbolic functions: analogous results, p. 155. 4.84 $\int \sin^m x \cos^n x dx$ by reduction formula, p. 158. 4.85 Integrals involving other transcendental functions, p. 162 | |
| | Exercise 4 (<i>l</i>) | 156 |
| | Exercise 4 (<i>m</i>) | 163 |

| | | |
|--|--|-----------------|
| 4.9 | Generalised integrals | <i>page</i> 164 |
| 4.91 | The problem, p. 164. | |
| 4.92 | Infinite range ('integrals of the first kind'), p. 165. | |
| 4.93 | Discontinuous integrand ('integrals of second kind'), p. 167. | |
| 4.94 | The relation $\int_a^b f(x) dx = \phi(b) - \phi(a)$, p. 169. | |
| 4.95 | Integration by parts and by substitution, p. 170 | |
| | Exercise 4(<i>n</i>) | 171 |
| | Miscellaneous Exercise 4(<i>o</i>) | 173 |
| CHAPTER 5. DIFFERENTIAL EQUATIONS | | 177 |
| 5.1 | Construction of differential equations | 177 |
| 5.11 | Elimination of parameters from a function, p. 177. | |
| 5.12 | Definitions, p. 178. | |
| 5.13 | Some general conclusions, p. 179 | |
| | Exercise 5(<i>a</i>) | 178 |
| 5.2 | First-order equations | 180 |
| 5.21 | One variable missing, p. 180. | |
| 5.22 | Equations whose variables are separable, p. 180. | |
| 5.23 | Homogeneous equations, p. 182. | |
| 5.24 | Equations reducible to homogeneous type, p. 183. | |
| 5.25 | Linear equations of first order, p. 185. | |
| 5.26 | Equations reducible to linear form, p. 187. | |
| 5.27 | Clairaut's equation, p. 189 | |
| | Exercise 5(<i>b</i>) | 181 |
| | Exercise 5(<i>c</i>) | 185 |
| | Exercise 5(<i>d</i>) | 189 |
| 5.3 | Second-order equations | 190 |
| 5.31 | Some simple special types, p. 190. | |
| 5.32 | Linear second-order equations, p. 192. | |
| 5.33 | Linear second-order equations with constant coefficients, p. 194. | |
| 5.34 | Particular solution in the case of constant coefficients, p. 199 | |
| | Exercise 5(<i>e</i>) | 192 |
| | Exercise 5(<i>f</i>) | 198 |
| | Exercise 5(<i>g</i>) | 201 |
| 5.4 | The operator D ; calculation of a p.s. | 201 |
| 5.41 | Algebraic properties of D , p. 201. | |
| 5.42 | Shift theorem, p. 202. | |
| 5.43 | Calculation of p.s. by symbolic methods, p. 203 | |
| | Exercise 5(<i>h</i>) | 208 |
| 5.5 | Simultaneous linear first-order equations with constant coefficients | 209 |
| | Exercise 5(<i>i</i>) | 211 |

| | | |
|--|---|-----------------|
| 5.6 | Some linear second-order equations with variable coefficients | <i>page</i> 211 |
| | 5.61 Euler's 'homogeneous' equation, p. 211. 5.62 Remarks on the use of equivalent operators, p. 212. 5.63 Solution of other equations by a given substitution, p. 213. 5.64 General case: one integral belonging to the c.f. known, p. 215 | |
| | Exercise 5 (<i>j</i>) | 216 |
| 5.7 | Some geometrical applications | 217 |
| | 5.71 Definitions, p. 217. 5.72 Orthogonal families of curves, p. 218 | |
| | Exercise 5 (<i>k</i>) | 219 |
| | Miscellaneous Exercise 5 (<i>l</i>) | 220 |
| CHAPTER 6. SOME THEOREMS OF THE DIFFERENTIAL CALCULUS | | |
| 6.1 | Two properties of continuous functions | 223 |
| 6.2 | Rolle's theorem | 224 |
| | 6.23 Application to algebraic equations, p. 226 | |
| 6.3 | Lagrange's mean value theorem | 226 |
| | 6.31 Linear approximation to $f(x)$, p. 227. 6.33 Alternative versions of the theorem, p. 228 | |
| | Exercise 6 (<i>a</i>) | 229 |
| 6.4 | The second mean value theorem | 230 |
| | 6.41 An algebraic lemma, p. 230. 6.42 Quadratic approximation to $f(x)$, p. 230 | |
| 6.5 | Theorems of Taylor and Maclaurin | 231 |
| | 6.51 Approximation to $f(x)$ by a polynomial of degree n , p. 231. 6.52 Maclaurin's form of the theorem, p. 232. 6.53 Closeness of the polynomial approximation, p. 233. 6.54 Other expressions for the remainder term, p. 234 | |
| 6.6 | Calculation of some n th derivatives | 236 |
| | 6.61 Elementary functions, p. 236. 6.62 Theorem of Leibniz on the n th derivative of a product, p. 237. 6.63 Maclaurin coefficients from a recurrence relation, p. 239 | |
| | Exercise 6 (<i>b</i>) | 240 |

| | | |
|--|--|-----------------|
| 6.7 | Further applications of the mean value theorems | <i>page</i> 241 |
| | 6.71 Turning points; concavity, inflexions, p. 241. | |
| | 6.72 Closeness of contact of two curves, p. 243. | |
| | 6.73 Approximate solution of equations by Newton's method, p. 244 | |
| | Exercise 6(c) | 247 |
| 6.8 | Cauchy's mean value theorem | 248 |
| 6.9 | 'Indeterminate forms': l'Hospital's rules | 249 |
| | Exercise 6(d) | 252 |
| | Miscellaneous Exercise 6(e) | 252 |
| CHAPTER 7. INTEGRATION AS A SUMMATION PROCESS | | 255 |
| 7.1 | Theory of the definite integral | 255 |
| | 7.11 'Area under a curve', p. 255. 7.12 The lower and upper sums, p. 257. 7.13 Definite integral defined arithmetically, p. 258. | |
| | 7.14 Properties; existence of an indefinite integral, p. 259 | |
| 7.2 | Definite integral as the limit of a single summation | 262 |
| | 7.22 Some definite integrals calculated as limiting sums, p. 262. | |
| | 7.23 Formula for change of variable in a definite integral, p. 265 | |
| | Exercise 7(a) | 266 |
| 7.3 | Approximate calculation of definite integrals | 266 |
| | 7.32 Trapezium rule, p. 266. 7.33 Simpson's rule, p. 267 | |
| | Exercise 7(b) | 269 |
| 7.4 | Further areas | 269 |
| | 7.41 Sign of an area, p. 269. 7.42 Area between two curves, p. 269. 7.43 Area of certain closed curves, p. 270. | |
| | 7.44 Generalised areas, p. 270. 7.45 Area of a sector (polar coordinates), p. 271. 7.46 Area of a sector (parametric formula), p. 272 | |
| 7.5 | Volume of a solid of known cross-section | 273 |
| | Exercise 7(c) | 275 |
| 7.6 | Length of a curve | 276 |
| | 7.61 Definition, and sign conventions, p. 276. 7.62 Cartesian formulae for arc-length, p. 276. 7.63 Polar formulae for arc-length, p. 278. 7.64 Derivative of s , p. 279 | |
| | Exercise 7(d) | 279 |
| 7.7 | Area of a surface of revolution | 280 |
| | 7.71 Area of a conical surface, p. 280. 7.72 General definition, p. 281 | |

| | | |
|--|---|-----------------|
| 7.8 | Centroids. The theorems of Pappus | <i>page</i> 282 |
| | 7.81 Centre of mass, centroid, p. 282. 7.82 Summary of well-known results, p. 283. 7.83 Theorems of Pappus, p. 284 | |
| | Exercise 7 (<i>e</i>) | 286 |
| 7.9 | Moments of inertia | 287 |
| | 7.91 Dynamical introduction, p. 287. 7.92 Examples, p. 287. 7.93 Theorem of parallel axes, p. 290. 7.94 Theorem of perpendicular axes (for a lamina), p. 291. 7.95 Routh's rule, p. 292 | |
| | Exercise 7 (<i>f</i>) | 292 |
| | Miscellaneous Exercise 7 (<i>g</i>) | 293 |
| CHAPTER 8. FURTHER GEOMETRICAL APPLICATIONS OF THE CALCULUS | | |
| | | 296 |
| 8.1 | Relations involving arc-length | 296 |
| | 8.11 Sign conventions, p. 296. 8.12 Differential relations (cartesian coordinates), p. 297. 8.13 Intrinsic equation, p. 298. 8.14 Differential relations (polar coordinates), p. 300 | |
| | Exercise 8 (<i>a</i>) | 300 |
| | Exercise 8 (<i>b</i>) | 303 |
| 8.2 | (p, r) equation | 304 |
| | 8.21 Definition, p. 304. 8.22 (p, r) equation from polar equation, p. 304. 8.23 Polar equation from (p, r) equation, p. 305 | |
| | Exercise 8 (<i>c</i>) | 306 |
| 8.3 | Curvature | 307 |
| | 8.31 Definitions, p. 307. 8.32 Formulae for κ or ρ , p. 308 | |
| | Exercise 8 (<i>d</i>) | 312 |
| 8.4 | Circle and centre of curvature | 313 |
| | 8.41 Osculating circle, p. 313. 8.42 Newton's formula for ρ , p. 316 | |
| | Exercise 8 (<i>e</i>) | 318 |
| 8.5 | Envelope of a family of curves | 318 |
| | 8.51 Definition and determination of the envelope, p. 318. 8.52 Examples, p. 320. 8.53 The evolute of a curve, p. 323. 8.54 Arc of the evolute, p. 324 | |
| | Exercise 8 (<i>f</i>) | 326 |
| | Miscellaneous Exercise 8 (<i>g</i>) | 326 |

| | |
|--|----------|
| CHAPTER 9. FUNCTIONS OF SEVERAL VARIABLES | page 329 |
| 9.1 Introduction | 329 |
| 9.11 Functions, limits, continuity, p. 329. | |
| 9.12 Economy in functional notation, p. 330 | |
| 9.2 Partial derivatives | 330 |
| 9.21 Definitions, p. 330. | |
| 9.22 Other notations, p. 331. | |
| 9.23 Geometrical meaning of $\partial u/\partial x$, $\partial u/\partial y$, p. 331. | |
| 9.24 Partial derivatives of second and higher orders, p. 332. | |
| 9.25 Partial differential equations, p. 335 | |
| Exercise 9(a) | 337 |
| 9.3 The total variation of $u(x, y)$. Small changes | 338 |
| 9.31 Total variation, p. 338. | |
| 9.32 Definition of 'differentiable function of (x, y) ', p. 339. | |
| 9.33 Small changes, p. 340 | |
| Exercise 9(b) | 341 |
| 9.4 Extensions of 'function of a function' | 342 |
| 9.41 Function of two functions of t , p. 342. | |
| 9.42 Total derivative; application to implicit functions, p. 343. | |
| 9.43 Function of two functions of (ξ, η) , p. 344. | |
| 9.44 Further examples: (1) Euler's theorem on homogeneous functions; | |
| (2) Laplace's equation $\partial^2 u/\partial x^2 + \partial^2 u/\partial y^2 = 0$; | |
| (3) the wave equation $\partial^2 y/\partial x^2 = (1/c^2) \partial^2 y/\partial t^2$, p. 348 | |
| Exercise 9(c) | 346 |
| Exercise 9(d) | 351 |
| 9.5 Differentials | 352 |
| 9.51 Definition, p. 352. | |
| 9.52 Principle of equating differential coefficients, p. 352. | |
| 9.53 Invariance of the expression for the differential, p. 353 | |
| 9.6 Further implicit functions | 354 |
| 9.61 Differentiation of equations, p. 354. | |
| 9.62 Derivatives of functions defined implicitly, p. 354 | |
| Exercise 9(e) | 357 |
| Miscellaneous Exercise 9(f) | 358 |
