

CONTENTS

INTRODUCTION

CHAPTER I. *PRELIMINARIES*

A. <i>Complexes</i>	1
B. <i>Subdivisions</i>	7
C. <i>Mappings and Equivalences</i>	11

CHAPTER II. *COMBINATORIAL AND STELLAR*

MANIFOLDS

A. <i>Combinatorial Manifolds</i>	17
B. <i>Starring Stellar Balls</i>	22
C. <i>Applications of Stellar Ball Theory to Manifolds</i>	35
D. <i>Equivalence of Stellar and Combinatorial Theory</i>	41

CHAPTER III. *WHITEHEAD'S REGULAR NEIGHBORHOODS*

A. <i>Simplicial and Geometrical Collapsing and Collapsible Neighborhoods</i>	49
B. <i>Whitehead's Regular Neighborhood Theorem</i>	70
C. <i>A Simple Unlinking Theorem and the Dunce Hat in S^4</i>	88

**CHAPTER IV. SOME IMPORTANT TECHNIQUES IN
COMBINATORIAL TOPOLOGY**

A. <i>The General Position Lemma</i>	95
B. <i>Zeeman's Proof of the Poincaré Conjecture</i>	111
C. <i>The Engulfing Lemma</i>	128
D. <i>Isotopies in Euclidean Space</i>	134
