

CONTENTS

Preface	v
Chapter I PRELIMINARIES	
1. Differential calculus on manifolds	1
2. Connections	18
3. Lie transformation groups	33
4. Manifolds with multiplications	48
Chapter II SYMMETRIC SPACES	
1. Definition and examples	63
2. The canonical connection	75
3. Connected spaces	90
4. Locally symmetric spaces	99
Chapter III SUBSPACES AND CONGRUENCES	
1. Subspaces	119
2. Congruences	130
Chapter IV DECOMPOSITION OF SYMMETRIC SPACES	
1. Riemannian spaces	139
2. Spaces of noncompact type	152
3. Fibration over compact spaces	164
4. The center	175
Bibliography	189
Notational conventions	193
Index	195
