

CONTENTS

VOLUME I.

	Preface	5
	Scientific program	9
	List of participants	19
C.G. D'AMBLY:	Whitney'schen Abhängigkeitsstrukturen	25
M. AIGNER and TH. A. DOWLING:	An extension of the König-Egerváry theorem	39
J.C. ARDITTI and R. CORI:	Hamilton circuits in the comparability graph of a tree	41
L. BABAI:	Representation of permutation groups by graphs . .	55
G. BARON:	Über verallgemeinerungen des Langford'schen Problems	81
G. BARÓTI:	Calcul des nombres de bircouvrements et de birevêtements d'un ensemble fini, employant la méthode fonctionnelle	93
E.G. BELTRAMETTI:	Lorentz transformations and symmetry properties in Galois space-time	105
C. BERGE:	Sur certains hypergraphes généralisant les graphes bipartites	119
W.G. BROWN and F. HARARY:	Extremal digraphs	135

S. A. BURR and R. L. GRAHAM:	On a class of equivalent linear and nonlinear integer programming problems	199
Y. CESARI:	Optimisation des questionnaires avec contrainte de rang	213
D. CHENAIS et M. TERRENOIRE:	Determination de la realisation d'un processus aléatoire a l'aide de pseudoquestionnaires	217
H. H. CRAPO:	Chromatic polynomials for a join of graphs.	239
J. CSIMA:	Stochastic functions on hypergraphs	247
J. DÉNES and E. TÖRÖK:	Groups and graphs	257
H. DINGES:	Combinatorial properties of partial sums with measure-theoretic applications	291
W. DÖRFLER und W. IMRICH:	Über die X-summe von Mengensystemen	297
P. ERDŐS:	On a lemma of Hajnal-Folkman	311
P. ERDŐS, L. GERENCSÉR and A. MÁTÉ:	Problems of graph theory concerning optimal design	317
P. ERDŐS, A. HAJNAL and E. C. MILNER:	Set mappings and polarized partition relations . . .	327
P. ERDŐS and J. KOMLÓS:	On a problem of Moser	365
P. ERDŐS and J. SCHÖNHEIM:	On the set of non pairwise coprime divisors of a number	369
P. ERDŐS and M. SIMONOVITS:	Some extremal problems in graph theory	377

VOLUME II.

P. ERDŐS and VERA T. SÓS:	Some remarks on Ramsey's and Turán's theorem.	393
P. ERDŐS and E. G. STRAUS:	Nonaveraging sets II.	405
D. FOATA and M. P. SCHÜTZENBERGER:	On the rook polynomials of Ferrers relations	413

J. H. FOLKMAN:	An upper bound on the chromatic number of a graph	437
Z. FÓNYAD, Gy. GYIMESI and M. HOSSZÚ:	The allocation of power resources on networks . . .	459
E. FRIED:	On homogeneous tournaments	467
J. GOLDMAN and G. -C. ROTA:	On the foundations of combinatorial theory IV Finite vector spaces and Eulerian generating functions.	477
M. GORDON:	Combinatorics and graph theory of abundance and stability of chemical species	511
F. GÖBEL:	On a close relation between Sperner collections and certain chance games	525
R. L. GRAHAM and B. L. ROTSCCHILD:	Ramsey's theorem for N-parameter sets: an outline	531
R. K. GUY:	Sequences associated with a problem of Turán and other problems	553
A. GYÁRFÁS and J. LEHEL:	A Helly-type problem in trees	571
A. HADIAN and M. SOBEL:	Selecting the t^{th} largest using binary errorless comparisons	585
A. HAJNAL and E. SZEMERÉDI:	Proof of a conjecture of P. Erdős	601
F. HARARY:	Problems involving graphical numbers	625
B. HARRIS and L. SCHOENFLED:	A composition theorem for the enumeration of certain subsets of symmetric semigroups and the corresponding sets of labeled functional digraphs. .	637
W. IMRICH:	Graphs with transitive Abelian automorphism group	651
A. JACQUES:	Constellations et graphes topologiques	657
H. A. JUNG:	On subgraphs without cycles in a tournament	675
H. J. L. KAMPS and J. H. van LINT:	A covering problem	679
G. O. H. KATONA:	How many sums of vectors can lie in a circle of radius $\sqrt{2}$?	687

G. O. H. KATONA and D. O. H. SZÁSZ:	Matching problems	695
D. A. KLARNER:	Methods for the general cell growth problem	705
J. KOMLÓS and M. SULYOK:	On the sum of elements of ± 1 matrices	721
W. KUICH:	Enumeration problems and context-free languages.	729
R. LANG:	Ein Kantenummerierungsproblem bei kubischen Graphen	737
D. H. LEHMER:	Permutation with strongly restricted displacements	755
YU. V. LINNIK:	Some combinatorial problems of multinomial sequential estimation	771
L. LOVÁSZ:	Generalized factors of graphs	773
N. S. MENDELSON:	Directed graphs with the unique path property	783

VOLUME III.

V. V. MENON:	Some partitions of, and the number of Borel fields on, large finite sets	801
C. St. J. A. NASH- WILLIAMS:	Hamiltonian lines in graphs whose vertices have sufficiently large valencies	813
J. NOVÁK:	Über gewisse Tripel-systeme	821
I. PALÁSTI:	On the common edges of Hamilton-cycles of a complete linear graph.	829
J. PELIKÁN:	Properties of balanced incomplete block designs	869
M. PETERSDORF and H. SACHS:	Spektrum und Automorphismengruppe eines Graphen	891
C. F. PICARD:	Combinatorial problems concerning rooted-trees.	909
N. J. PULLMAN:	Products of Boolean matrices	919
R. RADO:	Some partition theorems	929
H. RETKIN:	A cubic configuration in the plane of order 7.	937
C. RÉNYI and A. RÉNYI:	The Prüfer code for k-trees	945
C. A. ROGERS:	Holmes' graphical approach to the theory of complete metric spaces.	973

K. SARKADI:	Combinatorial proof for a theorem of H. E. Daniels	975
N. SAUER:	On the factorization of n-graphs	981
S. SCHWARZ:	On powers of binary relations on a finite set.	997
M. SIMONOVITS:	Extremal graph problems with conditions.	999
R. G. STANTON and J. D. HORTON:	Composition of room squares	1013
R. G. STANTON and D. P. ROSELLE:	A result on Davenport-Schinzel sequences	1023
L. SURÁNYI:	On a problem of P. Erdős and A. Hajnal	1029
A. A. SYKOW:	Algebraische Näherungen zur Hadwiger-Vermutung .	1043
E. SZEMERÉDI:	On a problem of P. Erdős	1051
P. TURÁN:	On some connections between combinatorics and group theory.	1055
H. J. VOSS:	Eigenschaften von Graphen, die eine bestimmte Anzahl kantenfremder Kreise enthalten und in denen der Grad der Knotenpunkte nach unten beschränkt ist	1083
B. L. van der WAERDEN:	On a theorem of Volker Strassen.	1103
K. WAGNER:	On the minimal graphs being not embeddable into the projective plane	1107
H. WALTHER:	Über grösste Kleinkreise und kleinste Grosskreise .	1111
W. WESSEL:	On the problem of determining whether a given graph is edge-critical or not.	1123
R. J. WILSON:	The Selberg sieve for a lattice	1141
	Problems	1151
