

## TABLE OF CONTENTS

PREFACE TO VOLUME II . . . . .	ix
NOTATION USED IN VOLUME II . . . . .	xi
CHAPTER 6. MINIMAL IDEALS AND MINIMAL CONDITIONS	
6.1 0-minimal zero ideals . . . . .	1
(Lemma 6.1–Theorem 6.9)	
6.2 The two-sided ideal generated by a 0-minimal right ideal . . . . .	8
(Lemma 6.10–Theorem 6.19)	
6.3 The right socle of a semigroup . . . . .	12
(Lemma 6.20–Corollary 6.24)	
6.4 Combined theory of the left and right socles of a semigroup . . . . .	16
(Theorem 6.25–Corollary 6.30)	
6.5 0-direct unions of 0-simple semigroups . . . . .	23
(Lemma 6.31–Theorem 6.40)	
6.6 $M_R$ , $M_L$ and similar minimal conditions . . . . .	30
(Lemma 6.41–Theorem 6.49)	
CHAPTER 7. INVERSE SEMIGROUPS	
7.1 The natural partial order on an inverse semigroup . . . . .	40
(Lemma 7.1–Theorem 7.5)	
7.2 Partial right congruences on an inverse semigroup . . . . .	42
(Lemma 7.6–Lemma 7.14)	
7.3 Representations by one-to-one partial transformations . . . . .	47
(Lemma 7.15–Theorem 7.33)	
7.4 Homomorphisms of inverse semigroups . . . . .	57
(Lemma 7.34–Theorem 7.48)	
7.5 Semilattices of inverse semigroups . . . . .	64
(Theorem 7.49–Corollary 7.53)	
7.6 Homomorphisms which separate idempotents . . . . .	65
(Theorem 7.54–Theorem 7.58)	
7.7 Homomorphisms onto primitive inverse semigroups . . . . .	71
(Theorem 7.59–Theorem 7.70)	
CHAPTER 8. SIMPLE SEMIGROUPS	
8.1 Baer-Levi semigroups . . . . .	82
(Lemma 8.1–Theorem 8.8)	
8.2 Croisot-Teissier semigroups . . . . .	86
(Lemma 8.9–Theorem 8.19)	

8.3	0-simple semigroups containing 0-minimal one-sided ideals: Gluskin's equivalence (Lemma 8.20–Theorem 8.32)	95
8.4	Bisimple inverse semigroups (Theorem 8.33–Theorem 8.44)	101
8.5	Any semigroup can be embedded in a simple semigroup. (Theorem 8.45–Corollary 8.50)	108
8.6	Any semigroup can be embedded in a bisimple semigroup with identity (Theorem 8.51–Corollary 8.56)	112
CHAPTER 9. FINITE PRESENTATIONS OF SEMIGROUPS AND FREE PRODUCTS WITH AMALGAMATIONS		
9.1	Free semigroups (Theorem 9.1–Theorem 9.10)	116
9.2	Finitely presented semigroups (Lemma 9.11–Theorem 9.14)	121
9.3	Finitely generated commutative semigroups are finitely presented (Lemma 9.15–Theorem 9.28)	125
9.4	Embedding semigroup amalgams: free products with amalgamations (Theorem 9.29–Theorem 9.48)	138
9.5	Construction of cancellative congruences (Lemma 9.49–Theorem 9.54)	163
CHAPTER 10. CONGRUENCES		
10.1	Admissible and normal sets (Lemma 10.1–Corollary 10.8)	175
10.2	The principal equivalences of Dubreil. (Lemma 10.9–Theorem 10.24)	182
10.3	The reversible equivalences of Dubreil (Theorem 10.25–Theorem 10.29)	193
10.4	Principal congruences (Lemma 10.30–Theorem 10.40)	198
10.5	Homomorphism theorems for subsemigroups (Lemma 10.41–Corollary 10.44)	204
10.6	Weakly permutable relations and the Jordan-Hölder Theorem (Lemma 10.45–Theorem 10.46)	208
10.7	Congruences on completely 0-simple semigroups (Theorem 10.47–Theorem 10.58)	214
10.8	Congruences on a full transformation semigroup $\mathcal{T}_X$ (Theorem 10.59–Theorem 10.77)	227
CHAPTER 11. REPRESENTATION BY TRANSFORMATIONS OF A SET		
11.1	Basic definitions (Lemma 11.1–Theorem 11.2)	250

11.2	Decomposition of an operand; fully reducible operands and semigroups . . . . .	256
	(Theorem 11.3–Theorem 11.4)	
11.3	Strictly cyclic operands and modular right congruences. . . . .	259
	(Lemma 11.5–Theorem 11.10)	
11.4	Representations by one-to-one partial transformations. . . . .	263
	(Corollary 11.11–Corollary 11.15)	
11.5	Irreducible and transitive operands and semigroups. . . . .	269
	(Lemma 11.16–Theorem 11.22)	
11.6	Various radicals of a semigroup . . . . .	274
	(Theorem 11.23–Corollary 11.27)	
11.7	The normalizer of a right congruence $\rho$ and the endomorphisms of $S/\rho$ . . . . .	279
	(Theorem 11.28)	
11.8	Representations by monomial matrices . . . . .	280
	(Theorem 11.29)	
11.9	Other types of representations . . . . .	284
	(Lemma 11.30–Lemma 11.32)	
CHAPTER 12. EMBEDDING A SEMIGROUP IN A GROUP		
12.1	The free group on a semigroup . . . . .	288
	(Lemma 12.1–Construction 12.3)	
12.2	The general problem of embedding a semigroup in a group . . . . .	292
	(Theorem 12.4–Theorem 12.6)	
12.3	Pták's conditions for embeddability . . . . .	294
	(Theorem 12.7–Theorem 12.10)	
12.4	The construction of quotients . . . . .	297
	(Lemma 12.11–Lemma 12.15)	
12.5	Lambek's polyhedral conditions for embeddability . . . . .	303
	(Theorem 12.16)	
12.6	Malcev's conditions for embeddability . . . . .	309
	(Theorem 12.17–Lemma 12.20)	
12.7	Comparison of Malcev and Lambek systems . . . . .	319
	(Theorem 12.21–Lemma 12.23)	
12.8	Finite sets of equational implications . . . . .	323
	(Lemma 12.24–Corollary 12.31)
