## *Part I. ANALYTICAL GEOMETRY IN THE PLANE*

1. ELEMENTARY PROBLEMS IN PLANE ANALYTICAL GEOMETRY	3
§ 1. The Axis and Intervals on an Axis. Coordinates on a Straight Line	3
§ 2. Rectangular Cartesian Coordinates in a Plane	7
§ 3. Polar Coordinates	9
§ 4. Directed Intervals. Projection of an Interval on to an Arbitrary Axis. Projection of an Interval on to a Coordinate Axis. Length and Polar Angle of an Interval. Distance between Two Points	14
§ 5. Division of an Interval in a Given Ratio	20
§ 6. Area of a Triangle	25
§ 7. Transformation of Coordinates	26
2. EQUATION OF A CURVE	31
§ 8. Functions of Two Variables	31
§ 9. The Concept of an Equation of a Curve. The Specification of a Curve by Means of an Equation	34
§ 10. Derivation of Equations for Previously Defined Curves	37
§ 11. Parametric Equations of a Curve	43
3. CURVES OF THE FIRST ORDER	47
§ 12. General Equation of a Straight Line. Equation of a Straight Line in Terms of its Gradient. Angle between Two Straight Lines. Condition for Two Lines to be Parallel or to be Perpendicular	47

§ 13.	Degenerate Equations of a Straight Line. Equation of a Straight Line in Terms of its Intercepts on the Axes. Compatibility of the Equations of Two and Three Lines	59
§ 14.	The Normal Equation of a Straight Line. How to Calculate the Distance of a Point from a Straight Line	65
§ 15.	Equation of a Pencil of Straight Lines	73
§ 16.	The Polar Equation of a Straight Line	78
4.	GEOMETRICAL PROPERTIES OF CURVES OF THE SECOND ORDER	81
§ 17.	The Circle	81
§ 18.	The Ellipse	90
§ 19.	The Hyperbola	104
§ 20.	The Parabola	116
§ 21.	The Polar Equation of the Ellipse, Hyperbola, and Parabola	124
§ 22.	Diameters of Curves of the Second Order	126
5.	SIMPLIFICATION OF THE GENERAL EQUATION OF A CURVE OF THE SECOND ORDER. THE EQUATIONS OF CERTAIN CURVES COMMONLY ENCOUNTERED IN MATHEMATICS AND ALLIED SUBJECTS	131
§ 23.	The Centre of a Curve of Second Order	131
§ 24.	Reduction of the Equation of a Central Curve of the Second Order to its Simplest Form	134
§ 25.	Reduction of a Parabolic Equation to its Simplest Form	139
§ 26.	The Equations of Certain Curves Commonly Encountered in Mathematics and Allied Subjects	143
	ANSWERS TO QUESTIONS AND NOTES ON SOLUTIONS	153
