Preface	V
<i>Chapter 1: Knots and Isotopies</i>	1
A Knots	1
B Equivalence of Knots	4
C Knot Projections	8
D Global Geometric Properties	11
E History and Sources	13
F Exercises	13
<i>Chapter 2: Geometric Concepts</i>	15
A Geometric Properties of Projections	15
B Seifert Surfaces and Genus	17
C Companion Knots and Product Knots	19
D Braids, Bridges, Plats	22
E Slice Knots and Algebraic Knots	24
F History and Sources	26
G Exercises	27
<i>Chapter 3: Knot Groups</i>	29
A Homology	29
B Wirtinger Presentation	31
C Peripheral System	38
D Knots on Handlebodies	40
E Torus Knots	44
F Asphericity of the Knot Complement	46
G History and Sources	47
H Exercises	47
<i>Chapter 4: Commutator Subgroup of a Knot Group</i>	49
A Construction of Cyclic Coverings	49
B Structure of the Commutator Subgroup	52

C	A Lemma of Brown and Crowell	53
D	Examples and Applications.....	56
E	Commutator Subgroups of Satellites	58
F	History and Sources	61
G	Exercises.....	62
 <i>Chapter 5: Fibred Knots</i>		65
A	Fibration Theorem	65
B	Fibred Knots	68
C	Applications and Examples.....	70
D	History and Sources	75
E	Exercises.....	75
 <i>Chapter 6: A Characterization of Torus Knots</i>		77
A	Results and Sources	77
B	Proof of the Main Theorem	79
C	Remarks on the Proof	85
D	History and Sources	87
E	Exercises.....	87
 <i>Chapter 7: Factorization of Knots</i>		89
A	Composition of Knots	89
B	Uniqueness of the Decomposition into Prime Knots: Proof	94
C	Fibred Knots and Decompositions	97
D	History and Sources	99
E	Exercises.....	99
 <i>Chapter 8: Cyclic Coverings and Alexander Invariants</i>		101
A	Alexander Module.....	101
B	Infinite Cyclic Covering and Alexander Module.....	102
C	Homological Properties of C_∞	107
D	Alexander Polynomials	109
E	Finite Cyclic Coverings	113
F	History and Sources	118
G	Exercises.....	119

<i>Chapter 9: Free Differential Calculus and Alexander Matrices</i>	121
A Regular Coverings and Homotopy Chains	121
B Fox Differential Calculus	123
C Calculation of Alexander Polynomials	125
D Alexander Polynomials of Links	129
E Finite Cyclic Coverings Again	133
F History and Sources	135
G Exercises	135
<i>Chapter 10: Braids</i>	139
A The Classification of Braids	139
B Normal Form and Group Structure	147
C Configuration Spaces and Braid Groups	151
D Braids and Links	156
E History and Sources	161
F Exercises	162
<i>Chapter 11: Manifolds as Branched Coverings</i>	163
A Alexander's Theorem	163
B Branched Coverings and Heegard Diagrams	168
C History and Sources	178
D Exercises	178
<i>Chapter 12: Montesinos Links</i>	181
A Schubert's Normal Form of Knots and Links with Two Bridges	181
B Viergeflechte (4-Plats)	185
C Alexander Polynomial and Genus of a Knot with Two Bridges	190
D Classification of Montesinos Links	195
E Symmetries of Montesinos Links	202
F History and Sources	208
G Exercises	208
<i>Chapter 13: Quadratic Form of a Knot</i>	211
A The Quadratic Form of a Knot	211
B Computation of the Quadratic Form of a Knot	219
C Alternating Knots and Links	225

D	Comparison of Different Concepts and Examples	230
E	History and Sources	237
F	Exercises.....	238
 <i>Chapter 14: Representations of Knot Groups</i>		 239
A	Metabelian Representations	239
B	A Class of Homomorphisms of \mathfrak{G} into the Group of Motions of the Euclidean Plane	244
C	Linkage in Coverings	250
D	Periodic Knots	255
E	History and Sources	266
F	Exercises.....	267
 <i>Chapter 15: Knots, Knot Manifolds, and Knot Groups</i>		 271
A	Examples	271
B	Property P for Special Knots	274
C	Prime Knots and their Manifolds and Groups	284
D	Groups of Product Knots	296
E	History and Sources	299
F	Exercises.....	300
 <i>Appendix A: Algebraic Theorems</i>		 301
<i>Appendix B: Theorems of 3-dimensional Topology</i>		307
<i>Appendix C: Tables</i>		311
<i>Appendix D: Knot Projections 0_1-9_{49}</i>		341
 Bibliography		 345
List of Code Numbers.....		381
List of Authors According to Codes.....		382
Glossary of Notations		393
Author Index		395
Index		397
