

TABLE OF CONTENTS

Introduction	1
I The Singularities of Stable Maps of Three Manifolds into the Plane	6
1.1 Stable Maps	6
1.2 Coordinatized Product Neighborhoods (CPN)	7
1.3 The space W_f and transverse manifolds at simple points	10
1.4 The non-simple S_1 -points and their transverse manifolds	15
1.5 A partial orientation of $S(f)$	21
1.6 Decomposing M and W_f	22
II Canonical Coordinatized Product Neighborhoods (C^2 PN)	25
2.0 Introduction and summary	25
2.1 A technical lemma and its corollaries	26
2.2 Canonical coordinatized product neighborhoods of near the vertices	28
2.3 Canonical coordinatized product neighborhoods of f along arcs of C	36
III Lifting Stable Maps of Three Manifolds into the Plane to Immersions in \mathbb{R}^4	47
3.0 Introduction and summary of the results	47
3.1 Necessary conditions on $h \mid B(R)$; the function r_h	52
3.2 Defining Rot	54
3.3 Fixing the immersion of $S(f)$ over $f \mid S(f)$; $[I] = [I_E]$	62
3.4 Standard forms for the germs of lifts at the vertices V ; $[I_{V_*}]_E = [I_E]_E$; $[I_{V_*}] = [I_E]$	66
3.5 Standard forms for the germs of lifts at $S(f)$; $[I_S]_S = [I_V]_V$, $[I_S]_E = [I_V]_E$, $[I_S] = [I_V]$	70
3.6 Standard forms for the germs of lifts at $\hat{\Sigma}$; $[I_\Sigma]_\Sigma = [I_S]_S$	76
3.7 Relations among $\{r, \delta, \sigma\}$ --those that arise from lifting $f \mid B(\Sigma)$	82
3.8 Additional relations on $\{\delta, \nu\}$ arising from the global lift of f	93
3.9 The last invariant of $[I_\Sigma]_\Sigma$; $[I_\Sigma]_\Sigma \longleftrightarrow Q$	106
3.10 The fibre of $[I_\Sigma]_\Sigma \longrightarrow [I]$	111
3.11 The equivalence relation on Q and the classification theorem	122

IV

Appendix	129
A-2.1 Lemma 0 and Corollaries 1, 2, 3	129
A-3.4 Lemma	140
A-3.6 Proposition 2 and Proposition 3	144
