

CONTENTS

INTRODUCTION	3
<i>Review</i>	3
<i>Preview</i>	14
Chapter I: FOUNDATIONS	20
1. <i>Basic constructions</i>	20
2. <i>Splice decomposition</i>	24
3. <i>Multilinks and genus</i>	26
4. <i>Fibration and monodromy</i>	34
5. <i>Alexander polynomial</i>	37
6. <i>Fitting ideals associated to Abelian covers</i>	42
Appendix to Chapter-I: ALGEBRAIC LINKS	48
<i>Algebraic links</i>	48
<i>The equation of a plane branch</i>	56
Chapter II: CLASSIFICATION	
7. <i>Classification of Seifert links</i>	59
8. <i>Classification of graph links and graph multilinks</i>	68
9. <i>Solvable and algebraic links as graph links in S^3</i>	75
Chapter III: INVARIANTS	83
10. <i>Linking numbers for graph links and multilinks</i>	83
11. <i>Norm and fibration for graph multilinks</i>	87
12. <i>Alexander polynomial for graph links</i>	95
13. <i>Monodromy revisited</i>	103
14. <i>Jordan normal form of the algebraic monodromy</i>	110
15. <i>Spliced knots: Seifert forms and algebraic monodromy</i>	114
Chapter IV: EXAMPLES	123
16. <i>Trivial geometric monodromy</i>	123
17. <i>Further examples</i>	125
