

CONTENTS

Foreword

Introduction to the English edition

Chapter 1. Partition of a set into sets of smaller diameter

| | |
|--|----|
| §1. The diameter of a set | 1 |
| §2. The problem | 2 |
| §3. A solution of the problem for plane sets | 4 |
| §4. Partition of a ball into parts of smaller diameter | 8 |
| §5. A solution for three-dimensional bodies | 16 |
| §6. Borsuk's conjecture for n -dimensional bodies | 31 |

Chapter 2. The covering of convex bodies with homothetic bodies and the illumination problem

| | |
|--|----|
| §7. Convex sets | 35 |
| §8. A problem of covering sets with homothetic sets | 38 |
| §9. A reformulation of the problem | 41 |
| §10. Solution of the problem for plane sets | 43 |
| §11. Hadwiger's conjecture | 44 |
| §12. The illumination problem | 46 |
| §13. A solution of the illumination problem for plane sets | 49 |
| §14. The equivalence of the two problems | 54 |
| §15. Some bounds for $c(F)$ | 60 |
| §16. Partition and illumination of unbounded convex sets | 63 |

Chapter 3. Some related problems

| | |
|---|----|
| §17. Borsuk's Problem for normed spaces | 69 |
| §18. The problems of Erdős and Klee | 76 |
| §19. Some unsolved problems | 82 |
