

CONTENTS

I.	Extended powers and H_{∞} ring spectra, by J. P. May.....	1
	§1. Equivariant half-smash products.....	1
	§2. Extended powers of spectra.....	5
	§3. H_{∞} ring spectra.....	11
	§4. Power operations and H_{∞}^d ring spectra.....	16
II.	Miscellaneous applications in stable homotopy theory, by J. P. May, with contributions by R. R. Bruner, J. E. McClure, and M. Steinberger...	21
	§1. Extended powers of wedges and transfer maps.....	22
	§2. Power operations and Nishida's nilpotency theorem.....	27
	§3. The Jones-Wegmann homology and cohomology theories.....	31
	§4. Jones' proof of the Kahn-Priddy theorem.....	39
	§5. The Singer construction and theorems of Lin and Gunawardena.....	44
	§6. Nishida's second nilpotency theorem.....	50
III.	Homology operations for H_{∞} and H_n ring spectra, by M. Steinberger.....	56
	§1. Construction and properties of the operations.....	57
	§2. Some calculations of the operations.....	60
	§3. Homology operations for H_n ring spectra, $n < \infty$	64
	§4. The splitting theorems.....	67
	§5. Proof of Theorem 2.4; some low-dimensional calculations.....	70
	§6. Proofs of Theorems 2.2 and 2.3.....	78
IV.	The homotopy theory of H_{∞} ring spectra, by R. R. Bruner.....	88
	§1. Cohomology of Hopf algebroids.....	90
	§2. Products and Steenrod operations in Ext.....	94
	§3. The Adams spectral sequence.....	101
	§4. Smash products in the Adams spectral sequence.....	106
	§5. Extended powers in the Adams spectral sequence.....	110
	§6. Milgram's generalization of the Adams spectral sequence.....	114
	§7. Homotopy operations for H_{∞} ring spectra.....	121
V.	The homotopy groups of H_{∞} ring spectra, by R. R. Bruner.....	129
	§1. Explicit homotopy operations and relations.....	129
	§2. Extended powers of spheres.....	141
	§3. Proofs for section 1 and other calculations.....	151

VI.	The Adams spectral sequence of H_{∞} ring spectra, by R. R. Bruner.....	169
§1.	Differentials in the Adams spectral sequence.....	171
§2.	Extended powers of cells.....	185
§3.	Chain level calculations.....	190
§4.	Reduction to three cases.....	194
§5.	Case (a): $v > k + p - 1$	200
§6.	Case (b): $v = k + 1$	201
§7.	Case (c): $v \leq k$	207
VII.	H_{∞} ring spectra via space-level homotopy theory, by J. E. McClure.....	215
§1.	The Whitehead category and the stable category.....	216
§2.	Pairings of spectra and prespectra.....	220
§3.	Extended pairings of spectra and prespectra.....	223
§4.	A vanishing condition for \lim^1 terms.....	229
§5.	H_{∞} ring spectra and prespectra.....	233
§6.	H_{∞}^d ring spectra.....	238
§7.	K-theory spectra.....	241
§8.	A Thom isomorphism for spectra.....	244
VIII.	Power operations in H_{∞}^d ring theories, by J. E. McClure.....	249
§1.	General properties of power operations.....	250
§2.	Steenrod operations in ordinary cohomology.....	256
§3.	Dyer-Lashof operations and the Nishida relations.....	263
§4.	Atiyah's power operations in K-theory.....	272
§5.	Tom Dieck's operations in cobordism.....	276
§6.	The Atiyah-Bott-Shapiro orientation.....	280
§7.	p-Local H_{∞} ring maps.....	284
IX.	The mod p K-theory of QX, by J. E. McClure.....	291
§1.	Generalized homology operations.....	293
§2.	The homology of CX.....	298
§3.	Dyer-Lashof operations in K-theory.....	306
§4.	Calculation of $K_*(CX; Z_p)$	316
§5.	Calculation of $\tilde{K}_*(D_p S_p^n; Z_p)$	321
§6.	Calculation of $\tilde{K}_*(D_p X; Z_p)$	326
§7.	Construction and properties of Q.....	331
§8.	Construction and properties of R and \mathfrak{A}	348
§9.	Cartan formulas.....	362
	Bibliography.....	378
	Index.....	384
	Index of notations.....	387
