<i>Preface</i>	xi
Introduction	1
Chapter I Base Spaces	
0. Introduction	5
1. The Category of Base Spaces	5
2. Some Simplicial Spaces	8
3. More Simplicial Spaces	11
4. Weak Simplicial Spaces	15
5. CW Spaces	19
6. Smooth Manifolds	23
7. Grassmann Manifolds	34
8. Some More Coverings	39
9. The Mayer–Vietoris Technique	41
10. Remarks and Exercises	47
Chapter II Fiber Bundles	
0. Introduction	57
1. Fibre Bundles and Fiber Bundles	60
2. Coordinate Bundles	66
3. Bundles over Contractible Spaces	73
4. Pullbacks along Homotopic Maps	75
5. Reduction of Structure Groups	80

6. Polar Decompositions	86
7. The Leray–Hirsch Theorem	93
8. Remarks and Exercises	97

Chapter III Vector Bundles

0. Introduction	105
1. Real Vector Bundles	105
2. Whitney Sums and Products	108
3. Riemannian Metrics	112
4. Sections of Vector Bundles	116
5. Smooth Vector Bundles	119
6. Vector Fields and Tangent Bundles	126
7. Canonical Vector Bundles	140
8. The Homotopy Classification Theorem	147
9. More Smooth Vector Bundles	158
10. Orientable Vector Bundles	160
11. Complex Vector Bundles	169
12. Realifications and Complexifications	172
13. Remarks and Exercises	178

Chapter IV $\mathbb{Z}/2$ Euler Classes

0. Introduction	191
1. The $\mathbb{Z}/2$ Thom Class $U_\zeta \in H^n(E, E^*)$	192
2. Properties of $\mathbb{Z}/2$ Thom Classes	194
3. $\mathbb{Z}/2$ Euler Classes	196
4. Gysin Sequences and $H^*(RP^x; \mathbb{Z}/2)$	199
5. The Splitting Principle	201
6. Axioms for $\mathbb{Z}/2$ Euler Classes	205
7. $\mathbb{Z}/2$ Euler Classes of Product Line Bundles	206
8. The $\mathbb{Z}/2$ Thom Class $V_\zeta \in H^n(P_\zeta \oplus_1, P_\zeta)$	209
9. Remarks and Exercises	211

Chapter V Stiefel–Whitney Classes

0. Introduction	215
1. Multiplicative $\mathbb{Z}/2$ Classes	216
2. Whitney Product Formulas	219
3. Orientability	226
4. The Rings $H^*(G^m(\mathbb{R}^x); \mathbb{Z}/2)$	227
5. Axioms for Stiefel–Whitney Classes	233
6. Dual Classes	237
7. Remarks and Exercises	238

Chapter VI Unoriented Manifolds

0. Introduction	249
1. $\mathbb{Z}/2$ Fundamental Classes	251
2. $\mathbb{Z}/2$ Poincaré–Lefschetz Duality	256
3. Multiplicative $\mathbb{Z}/2$ Classes of RP^n	258
4. Nonimmersions and Nonembeddings	260
5. Stiefel–Whitney Numbers	265
6. Stiefel–Whitney Genera	274
7. $\mathbb{Z}/2$ Thom Forms	276
8. The Thom–Wu Theorem	285
9. Remarks and Exercises	287
