

CONTENTS

Introduction	1
Chapter I. Structures on Riemannian manifolds	1
§1. Riemannian manifolds	1
§2. Kaehlerian manifolds	7
§3. Sasakian manifolds	9
§4. f -structure	12
Chapter II. Submanifolds	17
§1. Induced connection and second fundamental form	17
§2. Equations of Gauss, Codazzi and Ricci	20
§3. Normal connection	22
§4. Laplacian of the second fundamental form	25
§5. Submanifolds of space forms	29
§6. Parallel second fundamental form	37
Chapter III. Contact CR submanifolds	43
§1. Submanifolds of Sasakian manifolds	43
§2. f -structure on submanifolds	51
§3. Integrability of distributions	55
§4. Totally contact umbilical submanifolds	57
§5. Examples of contact CR submanifolds	59
§6. Flat normal connection	61
§7. Minimal contact CR submanifolds	70
Chapter IV. CR submanifolds	76
§1. Submanifolds of Kaehlerian manifolds	76
§2. CR submanifolds of Hermitian manifolds	83
§3. Characterization of CR submanifolds	85
§4. Distributions	90
§5. Parallel f -structure	94
§6. Totally umbilical submanifolds	96
§7. Examples of CR submanifolds	99
§8. Semi-flat normal connection	107
§9. Normal connection of invariant submanifolds	114
§10. Parallel mean curvature vector	118
§11. Integral formulas	129

§12. CR submanifolds of C^m	136
Chapter V. Submanifolds and Riemannian fibre bundles	141
§1. Curvature tensors	141
§2. Mean curvature vector	145
§3. Lengths of the second fundamental forms	149
Chapter VI. Hypersurfaces	152
§1. Real hypersurfaces of complex space forms	152
§2. Pseudo-Einstein real hypersurfaces	163
§3. Generic minimal submanifolds	170
§4. Semidefinite second fundamental form	177
§5. Hypersurfaces of S^{2n+1}	181
§6. (f, g, u, v, λ) -structure	194
Bibliography	198
Author index	204
Subject index	206
