Part I: The Stable Homotopy Category

| | |
|--|-----|
| CHAPTER 1: STABLE HOMOTOPY THEORY AND THE SPANIER–WHITEHEAD CATEGORY | 3 |
| §1. Stable Homotopy Theory | 3 |
| §2. The Spanier–Whitehead Category | 6 |
| CHAPTER 2. STABLE HOMOTOPY CATEGORIES | 20 |
| §1. The Axioms | 20 |
| §2. A Model for the Axioms | 27 |
| CHAPTER 3. COLIMIT STRUCTURES | 33 |
| §1. Weak Colimits in \mathcal{S} | 33 |
| §2. Some Applications | 38 |
| CHAPTER 4. HOMOLOGY AND COHOMOLOGY FUNCTORS | 45 |
| §1. Basic Properties of Homology and Cohomology Functors | 45 |
| §2. Finitely Determined Functors | 49 |
| §3. Representability Theorems | 59 |
| CHAPTER 5. APPLICATIONS OF HOMOLOGY AND COHOMOLOGY FUNCTORS | 64 |
| §1. Function and Dual Spectra | 64 |
| §2. Limit Structures | 70 |
| §3. Applications to Foundations | 74 |
| CHAPTER 6. G -HOMOLOGY AND G -COHOMOLOGY | 85 |
| §1. Eilenberg–MacLane Spectra | 85 |
| §2. HG_* and HG^* | 87 |
| §3. The Cellular Tower | 92 |
| CHAPTER 7. LOCALIZATION | 101 |
| CHAPTER 8. \mathcal{P} -LOCALIZATION | 109 |
| §1. Localization and Local Spectra | 110 |
| §2. The Relationship Between a Spectrum and its Localization | 125 |

| | |
|---|-----|
| CHAPTER 9. \mathcal{P} -COMPLETION | 128 |
| §1. Completion Constructions | 129 |
| §2. Categories of Complete Spectra | 143 |
| CHAPTER 10. UNIQUE FACTORIZATION, GENUS AND CANCELLATION | 152 |
| §1. Unique Factorization Theorems | 152 |
| §2. Application to the Structure of Finite Spectra | 160 |
| | |
| Part II: The Steenrod Algebra and Spectra: Surface Structure | |
| | |
| CHAPTER 11. MODULES OVER CONNECTED ALGEBRAS | 169 |
| §1. Basic Definitions | 169 |
| §2. The Projective Cover and Bounded Below Modules | 172 |
| §3. Structure in the Module Categories | 176 |
| §4. The Unique Decomposition Theorem | 181 |
| CHAPTER 12. MODULES OVER HOPF ALGEBRAS | 185 |
| §1. Hopf Algebras | 185 |
| §2. Finite Hopf Algebras | 188 |
| CHAPTER 13. MODULES OVER P -ALGEBRAS | 192 |
| §1. Definition and Basic Properties | 192 |
| §2. The Unbounded Case | 196 |
| §3. The Bounded Below Case | 199 |
| CHAPTER 14. THE STABLE CATEGORY OF MODULES | 204 |
| §1. The Stable Category of Modules | 205 |
| §2. The Stable Structure of Bounded Below Modules | 216 |
| §3. The Loop Functor | 222 |
| CHAPTER 15. THE MOD p STEENROD ALGEBRA AND MODULES OVER IT | 227 |
| §1. The Mod 2 Steenrod Algebra | 227 |
| §2. Modules over the Mod p Steenrod Algebra | 240 |
| §3. Doubling | 247 |

| | |
|---|-----|
| CHAPTER 16. Z_p -COHOMOLOGY AND THE STEENROD ALGEBRA | 249 |
| §1. Z_p -Cohomology and the Steenrod Algebra | 250 |
| §2. Some Elementary Applications | 261 |
| §3. Higher Operations and Realizability | 266 |
| §4. The Adams Spectral Sequence | 273 |
| CHAPTER 17. THE STABLE CATEGORY OF SPECTRA | 279 |
| §1. The Structure of the Stable Category of Spectra | 280 |
| §2. Relation to Other Structure | 292 |
| §3. Secondary Phenomena | 297 |
| Part III: The Steenrod Algebra and Spectra: Deep Structure | |
| CHAPTER 18. MODULES OVER EXTERIOR ALGEBRAS | 313 |
| §1. The Homology Groups | 314 |
| §2. Modules over $E[e_1, e_2]$ | 316 |
| §3. The Whitehead Theorem | 320 |
| §4. Killing the Homology Groups | 321 |
| §5. The Periodicity Problem | 327 |
| CHAPTER 19. THE $P_i^?$ -HOMOLOGY GROUPS OF MODULES | 330 |
| §1. The Homology Groups of A -Modules | 331 |
| §2. The Whitehead Theorem | 335 |
| §3. The Homology Groups and Structure in ${}_A\mathcal{M}$ | 340 |
| §4. The Homology Groups of Extended Modules | 344 |
| CHAPTER 20. THE $P_i^?$ -COHOMOLOGY GROUPS OF SPECTRA | 352 |
| §1. The $P_i^?$ -Cohomology Groups of Spectra | 352 |
| §2. The P_i^0 -Cohomology Groups | 359 |
| CHAPTER 21. KILLING THE $P_i^?$ -GROUPS | 371 |
| §1. The Killing Constructions | 372 |
| §2. Proof of the Existence Theorem | 377 |
| CHAPTER 22. MODULES AND SPECTRA WITH $P_i^?$ -GROUPS KILLED | 388 |
| §1. Complementarity | 389 |
| §2. Convergence | 390 |
| §3. Connectivity | 398 |
| §4. Complexity | 401 |

| | |
|---|-----|
| CHAPTER 23. MODULES AND SPECTRA WITH ONE NON-VANISHING P_i^* -GROUP | 407 |
| §1. P_i^* -Local Objects | 407 |
| §2. P_i^0 -Local Objects | 410 |
| §3. Periodicity | 413 |
| CHAPTER 24. APPLICATIONS OF THE P_i^* -GROUPS | 425 |
| §1. Applications to the Adams Spectral Sequence | 425 |
| §2. Application to Localization | 430 |
| §3. Application to Bordism | 434 |

Appendices

| | |
|---|-----|
| APPENDIX 1. CATEGORIES AND LIMIT STRUCTURES | 439 |
| §1. General Notions | 439 |
| §2. Limit Structures | 443 |
| §3. Categories of Fractions | 450 |
| APPENDIX 2. TRIANGULATED CATEGORIES | 453 |
| APPENDIX 3. LOCALIZATION AND COMPLETION OF ABELIAN GROUPS | 471 |
| §1. Localization | 471 |
| §2. Completion | 474 |
| Bibliography | 480 |
| Symbol List | 485 |
| Index | 487 |
