

C O N T E N T S

Preface	vii
Chapter 1. DIFFERENTIABLE MANIFOLDS	
§1. Tensors	1
§2. Tensor Algebras	5
§3. Exterior Algebras	7
§4. Differentiable manifolds	11
§5. Vector Fields and Differential Forms	15
§6. Sard's Theorem and Morse's Inequalities	20
§7. Fibre Bundles	23
§8. Integration of Differential Forms	28
§9. Homology, Cohomology and deRham's Theorem	37
§10. Frobenius' Theorem	42
Chapter 2. RIEMANNIAN MANIFOLDS	
§1. Affine Connections	46
§2. Pseudo-Riemannian Manifolds	53
§3. Riemannian Manifolds	56
§4. Exponential Map and Normal Coordinates	62
§5. Weyl Conformal Curvature Tensor	64
§6. Kaehler Manifolds and Quaternionic Kaehler Manifolds	67
§7. Submersions and Projective Spaces	71
Chapter 3. HODGE THEORY AND SPECTRAL GEOMETRY	
§1. Operators $*$, δ and Δ	78
§2. Elliptic Differential Operators	85
§3. Hodge-deRham Decomposition	91
§4. Heat Equation and its Fundamental Solution	95
§5. Spectra of Some Important Riemannian Manifolds	100

Chapter 4. SUBMANIFOLDS

§1. Induced Connections and Second Fundamental Form	109
§2. Fundamental Equations and Fundamental Theorems	116
§3. Submanifolds with Flat Normal Connection	124
§4. Totally Umbilical Submanifolds	128
§5. Minimal Submanifolds	135
§6. The First Standard Imbeddings of Projective Spaces	141
§7. Total Absolute Curvature of Chern and Lashof	157
§8. Riemannian Submersions	167
§9. Submanifolds of Kaehler Manifolds	171

Chapter 5. TOTAL MEAN CURVATURE

§1. Some Results Concerning Surfaces in \mathbb{R}^3	182
§2. Total Mean Curvature	187
§3. Conformal Invariants	203
§4. A Variational Problem Concerning Total Mean Curvature	213
§5. Surfaces in \mathbb{R}^m which are Conformally Equivalent to a Flat Surface	226
§6. Surfaces in \mathbb{R}^4	236
§7. Surfaces in Real-Space-Forms	244

Chapter 6. SUBMANIFOLDS OF FINITE TYPE

§1. Order of Submanifolds	249
§2. Submanifolds of Finite Type	255
§3. Examples of 2-type Submanifolds	260
§4. Characterizations of 2-type Submanifolds	269
§5. Closed Curves of Finite Type	283
§6. Order and Total Mean Curvature	293
§7. Some Related Inequalities	300
§8. Some Applications to Spectral Geometry	303

Contents

xi

§9. Spectra of Submanifolds of Rank-one Symmetric Spaces	307
§10. Mass-symmetric Submanifolds	320
Bibliography	325
Author Index	341
Subject Index	347
