CONTENTS

Preface.....1

CHAPTER I: THE WITT CLASS OF A TRACE FORM

I.1 Introduction.....5
I.2 Witt Rings.....8
I.3 Discriminant of an Algebraic Extension.....22
I.4 Quadratic Extensions.....25
I.5 Base Lifting.....30
I.6 Product Decomposition.....35
I.7 Multiples of Algebraic Classes.....38
I.8 Normal Extensions of Degree 2 (Mod 4).....40
I.9 Normal Extensions of Even Degree.....43
I.10 Torsion Classes in W(Q).....51
I.11 Normal Classes are Abelian in W(Q).....57

CHAPTER II: THE HASSE-WITT INVARIANT OF A TRACE FORM

II.1 Introduction.....67
II.2 Extensions of Finite Fields.....68
II.3 Unramified Local Extensions.....75
II 4 Computation of ∂_p.....79
II.5 The Local Knebusch Sequence.....84
II.6 Totally Ramified Extensions.....91
II.7 Algebraic Classes in $W(Q_p)$.....99
II.8 Normal Local Extensions.....102
II.9 The Cycle Associated to a Witt Class.....112
II.10 Classes of Even Signature are Algebraic.....118

CHAPTER III: EXAMPLES OF TRACE FORMS ON EXTENSIONS OF Q

III.1 Introduction.....126
III.2 Quadratic Extensions.....127
III.3 Extensions of Degree 3.....131

III.4 Pure Equations....138
III.5 Scaled Trace Forms....141
III.6 Witt Classes of Signature 1....148
III.7 Extensions of Degree 4....152
III.8 A Modulo 4 Reciprocity Formula....158
III.9 Further Questions....166

CHAPTER IV: THE INTEGRAL TRACE FORM ON A CYCLIC EXTENSION OF ODD PRIME DEGREE

IV.1 Introduction....169
IV.2 Modules Over a Group Ring....171
IV.3 Symmetric Circulants....173
IV.4 Induced Circulants....174
IV.5 Product Circulants....177
IV.6 The Group C_q....178
IV.7 Tamely Ramified Extensions....186
IV.8 Lagrangian Basis....192
IV.9 The Wildly Ramified Case....196
IV.10 The Ring $Z\ q^{-1}$....199
IV.11 The Ring $O\ q^{-1}$....201
IV.12 Examples....205
IV.13 Conductors....211
IV.14 Triviality of the Obs(F/Q)....213
IV.15 A Fake Cyclic Extension....216

CHAPTER V: NORMAL EXTENSIONS AND EQUIVARIANT WITT RINGS

V.1 Introduction....218
V.2 The Equivariant Witt Ring....220
V.3 A Multiplicative Relation....226
V.4 Odd Degree Normal Extensions of Q....230
V.5 An invariant from Topology....231
V.6 Local Normal Extensions....238
V.7 Cyclic Extensions of Degree 2^{k+1}....245

V.8 The Local Boundary....249
V.9 The Global Case....257
V.10 Cyclic Witt Classes....260
V.11 The Group W(Z,G)....266
V.12 Appendix....271

CHAPTER VI. EXAMPLES AND APPLICATIONS OF TRACE FORM CONSIDERATIONS

VI.1 Introduction....281
VI.2 Irreducible Trinomials....285
VI.3 Normal Extensions with Non-Square Discriminant...294
VI.4 Solvable Trinomials....304
VI.5 Quintic Extensions....309

REFERENCES....314
