

Contents

Introduction	
Conventions	
Chapter 1	
Basic Group Theory	1
Chapter 2	
Basic Ring Theory	22
including the Artin and Wedderburn Theorems	
Chapter 3	
Commutative Algebra	51
Galois theory, algebraic integers and primitive prime divisors	
Chapter 4	
Representation Theory	75
Chapter 5	
Hering's Theorem and Applications	120
including the theory of Block Designs	
References	146
Index	149
