Contents

Series Editors' Foreword . . . . . **xi**

Preface . . . . . **xv**

Background Notation . . . . . **xix**

Chapter 1 Topology **1**

1.1 Topological Spaces 1
1.2 Metric Spaces 9
1.3 Continuity 14
1.4 Subspaces, Products, and Quotients 18
1.5 Compactness 24
1.6 Connectedness 31

Chapter 2 Banach Spaces and Differential Calculus **37**

2.1 Banach Spaces 37
2.2 Linear and Multilinear Mappings 52
2.3 The Derivative 67
2.4 Properties of the Derivative 75
2.5 The Inverse and Implicit Function Theorems 102

Chapter 3 Manifolds and Vector Bundles 122

3.1 Manifolds 122
3.2 Submanifolds, Products, and Mappings 129
3.3 Vector Bundles 133
3.4 The Tangent Bundle 150
3.5 Submersions, Immersions and Transversality 161

Chapter 4 Vector Fields and Dynamical Systems 184

4.1 Vector Fields and Flows 184
4.2 Vector Fields as Differential Operators 207
4.3 An Introduction to Dynamical Systems 240
4.4 Frobenius' Theorem and Foliations 260

Chapter 5 Tensors 271

5.1 Tensors in Linear Spaces 271
5.2 Tensor Bundles and Tensor Fields 283
5.3 The Lie Derivative: Algebraic Approach 293
5.4 The Lie Derivative: Dynamic Approach 304
5.5 Partitions of Unity 309

Chapter 6 Differential Forms 323

6.1 Exterior Algebra 323
6.2 Determinants, Volumes, and the Hodge Star Operator 335
6.3 Differential Forms 351
6.4 The Exterior Derivative, Interior Product, and Lie Derivative 356
6.5 Orientation, Volume Elements, and the Codifferential 381

Chapter 7 Integration on Manifolds 395

7.1 The Definition of the Integral 395
7.2 Stokes' Theorem 403
7.3 The Classical Theorems of Green, Gauss, and Stokes 424
7.4 Induced Flows on Function Spaces and Ergodicity . 433
7.5 Introduction to Hodge–deRham Theory and Topological Applications of Differential Forms. . . . 440

Chapter 8 Applications **461**
8.1 Hamiltonian Mechanics 462
8.2 Fluid Mechanics 481
8.3 Maxwell's Equations 498
8.4 Thermodynamics, Constraints, and Control 511

Appendix A. Zorn's Lemma and Baire Spaces **522**

Appendix B. The Three Pillars of Linear Analysis **526**

Appendix C. Unbounded and Self-adjoint Operators **530**

Appendix D. Stone's Theorem **541**

Appendix E. The Sard and Smale Theorems **551**

References **562**

Index **570**
