

CONTENTS

Foreword

| | | |
|------|---|-----|
| § 1. | Hilbert ideas in mathematics and its related topics | 1 |
| 2. | Higher order, many sorted theories. | 16 |
| 3. | A way to formal theories. | 23 |
| 4. | Higher order, many sorted formal theories | 31 |
| 5. | A way to new geometrics | 50 |
| 6. | Configuration theory (segment calculus) | 54 |
| 7. | Reflection calculus | 70 |
| 8. | Elliptic planes | 79 |
| 9. | An ordered metric plane | 86 |
| 10. | Theorems of three reflections | 89 |
| 11. | Various planes. | 98 |
| 12. | Group theoretic approach. | 107 |
| 13. | Hjelmslev's theorem in a group geometry | 119 |
| 14. | Ordered skew fields | 122 |
| 15. | Non - Archimedean ordered fields. | 136 |
| 16. | Real closed fields. | 151 |
| 17. | Ultrafilters. | 167 |
| 18. | Ultraproducts and its applications. | 180 |
| 19. | Quasi - ordered fields. | 206 |
| 20. | Quadratic ring extensions | 227 |
| 21. | Hjelmslev rings and Hjelmslev planes. | 242 |
| 22. | 2 - normed spaces | 253 |
