PREFACE

ACKNOWLEDGEMENT

NOTATION

## PART I TOPICS IN SIEVE METHODS

### CHAPTER I. THE $\Lambda^2$ -SIEVE

§ 1.1 Selberg's Sieve for Intervals	...	1
§ 1.2 The Hybrid Dual Sieve for Intervals	...	12
§ 1.3 An Auxiliary Result Relating to the $\Lambda^2$ -Sieve		20
§ 1.4 The Hybrid Dual Sieve for Multiplicative Functions	...	25
NOTES (I)	...	37

### CHAPTER II. ELEMENTS OF THE COMBINATORIAL SIEVE

§ 2.1 Rosser's Identity	...	43
§ 2.2 The Fundamental Lemma	...	52
§ 2.3 A Smoothed Version of Rosser's Identity	...	60
NOTES (II)	...	65

### CHAPTER III. THE LINEAR SIEVE

§ 3.1 A Difference-Differential Equation	...	69
§ 3.2 The Optimal Value of $\beta$	...	77
§ 3.3 Rosser's Linear Sieve	...	86
§ 3.4 Iwaniec's Linear Sieve	...	95
NOTES (III)	...	106

PART II      TOPICS IN PRIME NUMBER THEORY

CHAPTER IV.	<u>ZERO-FREE REGIONS FOR <math>\zeta(s)</math> AND <math>L(s,\chi)</math></u>	
§ 4.1	Vinogradov's Zero-Free Region for $\zeta(s)$	... 110
§ 4.2	The Deuring-Heilbronn Phenomenon	... 123
§ 4.3	The Brun-Titchmarsh Theorem	... 129
	NOTES (IV)	... 141
CHAPTER V.	<u>ZERO-DENSITY THEOREMS</u>	
§ 5.1	A Zero-Density Estimate for $\zeta(s)$	... 146
§ 5.2	A Zero-Density Estimate of the Linnik Type...	158
	NOTES (V)	... 163
CHAPTER VI.	<u>PRIMES IN SHORT INTERVALS AND SHORT</u> <u>ARITHMETIC PROGRESSIONS</u>	
§ 6.1	Existence of Primes in Short Intervals	... 167
§ 6.2	Existence of Primes in Short Arithmetic Progressions	... 183
	NOTES (VI)	... 193
	REFERENCES	... 198
