

TABLE OF CONTENTS

Preface	ix
Chapter I. Planar Complexes	
1. Triangulations	2
2. Extending triangulations	4
3. Special triangulations	6
Chapter II. PL Planar Maps	
1. Linear maps	9
2. PL maps	11
3. Pushes	13
4. Isotopies	15
5. Meshing triangulations	17
Chapter III. The Schoenflies Theorem	
1. PL Schoenflies theorem	20
2. Triangulating PL disks	22
3. Skew sets	23
4. No arc separates R^2	26
5. Jordan-Brouwer theorem	27
6. Schoenflies theorem	29
Chapter IV. Wild 2-Spheres	
1. Tame and wild 2-spheres	33
2. 3-spheres	34
3. Alexander horned sphere	38
4. Simple connectivity	41
5. Solid Alexander horned sphere	42
6. Peculiar involutions	43
7. Antoine's necklace	44
8. An Antoine wild sphere	47
9. Fox-Artin spheres	47
10. Bing's hooked rug	53
Chapter V. The Generalized Schoenflies Theorem	
1. Schoenflies theorem for a 2-sphere	57
2. Generalized Schoenflies theorem	57
3. Canonical collared Schoenflies theorem	62

4. Local flatness	64
5. Weakness of the generalized Schoenflies theorem	64
Chapter VI. The Fundamental Group	
1. Paths and loops	69
2. The fundamental group	72
3. Graphs	73
4. Associating words with loops	74
5. Relations	78
6. Shelling	80
7. Changing words	80
8. Presentations of groups	83
9. Short cuts	84
10. Why compute fundamental groups	88
11. A homotopy cube	94
12. Other treatments	95
Chapter VII. Mapping onto Spheres	
1. Retractions onto boundaries	97
2. AR's and ANR's	98
3. Extending mappings onto spheres	98
4. Inessential mappings	99
5. Projections	101
6. Separating R^n	101
7. Fixed points	102
Chapter VIII. Linking	
1. Chains, cycles, bounding cycles	105
2. Linking polygons	108
3. Linking curves	109
4. Alexander addition theorem	109
5. Balls do not link	111
6. Nonlinking curves	112
7. Homology groups	113
Chapter IX. Separation	
1. General position approximations	115
2. Separation by spheres	117
3. Jordan-Brouwer theorem	118
4. Local separation	119
Chapter X. Pulling Back Feelers	
1. Pull-back theorems	123
2. Reimbedding a crumpled cube	126
3. Repeated pull-backs	126
4. Sewing cubes together	128
5. Pulling feelers off a null sequence of disks	129

Chapter XI.	Intersections of Surfaces with 1-Simplexes	
1.	Picking a triangulation	131
2.	Simplifying $K^2 \cap \Delta^1$	132
3.	Shrinking at the waist	133
4.	Removing noncircling components	135
5.	Removing circling continua	137
6.	Locating $h(K^2)$	137
Chapter XII.	Intersections of Surfaces with Skeleta	
1.	Expanding closed sets	141
2.	Pushing on a membrane	143
3.	Eliminating nonpiercing points	144
4.	Reducing components	146
5.	Simplifying $T^2 \cap S$	150
Chapter XIII.	Side Approximation Theorem	
1.	Very special case	152
2.	Modification of very special case	154
3.	Special case	155
4.	General case	158
Chapter XIV.	The PL Schoenflies Theorem for R^3	
1.	Extending the PL Schoenflies theorem	161
2.	Pushing disks about on tetrahedra	161
3.	Extending a θ curve result	163
4.	Special case of the PL Schoenflies theorem for R^3	164
5.	General case of the PL Schoenflies theorem for R^3	167
6.	Shelling	169
	A. The-house-with-two-rooms	170
	B. Cube with knotted spanning 1-simplex	172
Chapter XV.	Covering Spaces	
1.	Examples and definitions	175
2.	Using splittings	176
3.	Lifting paths	177
4.	Using paths	179
5.	Two-sheeted coverings	180
Chapter XVI.	Dehn's Lemma	
1.	Singular disks	183
2.	Nice singularities	183
3.	Splitting and resewing	184
4.	Eliminating branch points	187
5.	Trying to remove more singularities	192
6.	Thickening disks	193
7.	History of Dehn's lemma	198
8.	A strong version of Dehn's lemma	199

Chapter XVII.	Loop Theorem	
1.	Versions of the loop theorem	203
2.	Eliminating branch points	206
3.	Thickening canonical disks	206
4.	Proof of loop theorem	207
5.	History	210
Chapter XVIII.	Related Results	
1.	Approximating 2-complexes	211
2.	Approximating homeomorphisms on 3-manifolds	212
3.	Triangulating 3-manifolds	213
4.	Locally tame sets are tame	214
5.	Tameness from the side	215
6.	Reembedding crumpled cubes	217
7.	Tame sets in wild surfaces	218
8.	Characterizations	219
9.	Decompositions	220
10.	Other references	221
Appendix –	Some Standard Results in Topology	
1.	Metric spaces	223
2.	Planar results	224
3.	Results about 2-spheres	225
4.	Cylinders in R^3	226
5.	Decompositions	226
