TABLE OF CONTENTS

Introduction IX

PART I 1

0. Algebraic structures 1

0.1.—0.3. From loops to commutative fields 1
0.4. Ternary fields. 6
0.5. Strong quasi-fields as ternary fields. 8
0.6. Selected algebraic notions 9

1. Collinearity structures 12

1.1. Collinearity 12
1.2. Lines 14

2. Affine planes 16

2.1. Affine planes as collinearity structures 16
2.2. Parallelity planes 19
2.3. Parallel lines 23
2.4. Parallelograms and trapezoids 26
2.5. Translations and homotheties 29

3. Desarguean and Pappian affine planes 38

3.1. Transitive groups of translations and homotheties . . 38
3.2. Desargues laws 40
3.3. Pappus's law 43
3.4. Translation planes 52
3.5. Homothety planes 58

4. Coordinatization and algebraic representation of affine planes 67

4.0. Algebraic parallelity planes 67
4.1. Coordinatization and its parameters 70
4.2. Construction of the Cartesian coordinate system . . . 72

4.3. Construction of the double loop 74
4.4. Construction of the ternary field and algebraic description of the parallelity relation 78
4.5. Representation theorems 81
4.6. Appendix to § 2.2. 85

PART II 88

5. Midpoint algebras 88

5.1. Groups with the operator $\frac{1}{2}$ 88

5.2. Midpoint algebras 89

5.3. Groups with the operator $\frac{1}{2}$ as midpoint algebras with zero 91

5.4. Vector groups 93

6. Translation planes of characteristic $\neq 2$ 96
6.1. Characteristic $\neq 2$ 96
6.2. Geometric midpoints 100
6.3. Midpoint planes 102
6.4. Representation theorem. 108

7. Algebraic structures with a linear ordering 110
7.1. Linear orders and betweenness relations 110
7.2. (Appendix to § 7.1) The betweenness relation on a set of cardinality $\neq 4$ 120
7.3. Ordered groups 125
7.4. (Appendix to § 7.3) Orderability of a commutative group without cyclic elements 129
7.5. Ordered quasi-fields 132
7.6. Ordered midpoint algebras 136
7.7. Orderings compatible with a midpoint operation . . . 142

8. Ordered affine planes 146
8.1. The betweenness relation on an affine plane and the Pasch axiom 146
8.2. Ordered translation planes 153
8.3. Representation theorem. 156

PART III 162

9. Euclidean planes 162

9.1. Desarguean Euclidean planes 162
9.2. Equi-orthogonal basis 169
9.3. Coordinatization 175
9.4. Pappian Euclidean planes 180
9.5. Equidistance and perpendicularity. 183

Bibliography 186

Bibliography of the works of Wanda Szmielew 188

List of algebraic symbols 190

List of geometric symbols 191
