

CONTENTS

| | |
|--------------------------------------------------------------|-----|
| § 1. Derivations | 1 |
| § 2. Differential Algebras | 20 |
| § 3. Universal Extension of a Differential Algebra | 36 |
| § 4. Description of the Universal Extension in Special Cases | 54 |
| § 5. Differential Modules of Field Extensions | 72 |
| § 6. Differential Modules of Local Rings | 93 |
| § 7. Differential Modules of Affine Algebras | 117 |
| § 8. Smooth Algebras | 138 |
| § 9. Differential Modules of Complete Intersections | 150 |
| § 10. The Kähler Differents (Jacobian Ideals) of an Algebra | 159 |
| § 11. Universally Finite Differential Algebras | 171 |
| § 12. Differential Algebras and Completion | 182 |
| § 13. Differential Modules of Semianalytic Algebras | 193 |
| § 14. Regularity Criteria for Semianalytic Algebras | 211 |
| § 15. Existence of p -Bases | 231 |
| § 16. Traces of Differential Forms | 245 |
| § 17. Residues in Algebraic Function Fields of one Variable | 269 |

APPENDICES

| | |
|--------------------------------------------------|-----|
| A. Commutative Algebras | 287 |
| B. Dimension Formulas in Algebras of Finite Type | 296 |
| C. Complete Intersections | 313 |
| D. The Fitting Ideals of a Module | 331 |
| E. The Dual of a Module over a Noetherian Ring | 342 |
| F. Traces | 358 |
| G. Differents | 383 |
