

T A B L E O F C O N T E N T S

INTRODUCTION		VII
Chapter I	RINGED SPACES	
	§ 1. k -ringed spaces	1
	§ 2. Coherent sheaves	4
	§ 3. Embeddings	7
	Bibliography	10
Chapter II	SPACES AND VARIETIES	
	§ 1. General properties	11
	§ 2. Local properties	18
	§ 3. Global properties	24
	§ 4. Antiinvolutions	30
	Bibliography	38
Chapter III	COMPLEXIFICATION	
	§ 1. Complexification of germs	40
	§ 2. Local complexification	44
	§ 3. Global complexification	50
	Bibliography	59
Chapter IV	REAL ANALYTIC VARIETIES	
	§ 1. Real part	60
	§ 2. Analytic subvarieties	63
	§ 3. Normalization	71
	§ 4. Desingularization	77
	Bibliography	81
Chapter V	EMBEDDINGS OF STEIN SPACES	
	§ 1. A first relative embedding theorem	83
	§ 2. A second relative embedding theorem	96
	§ 3. σ -invariant embedding theorems	100
	Bibliography	108

Chapter VI	EMBEDDINGS OF REAL ANALYTIC VARIETIES OR SPACES	
	§ 1. Varieties: the general case	109
	§ 2. Varieties: the pathological case	112
	§ 3. The non reduced case	118
	§ 4. Topologies on $C^m(X, \mathbb{R}^q)$	118
	Bibliography	127
Chapter VII	APPROXIMATIONS	
	§ 1. The weak and strong topologies	129
	§ 2. Approximations	131
	Bibliography	147
Chapter VIII	FIBRE BUNDLES	
	§ 1. Generalities on analytic fibre bundles	149
	§ 2. A classification theorem	158
	Bibliography	160
