Introduction	<i>page vii</i>
<b>1 Basic concepts</b>	<b>1</b>
1.1 Introduction	1
1.2 Basic definitions and properties	2
1.3 Examples	11
1.4 Related structures	22
1.5 The incidence matrix	32
1.6 Block's Lemma and the Orbit Theorem	43
1.7 Graphs	48
<b>2 Symmetric designs</b>	<b>52</b>
2.1 Introduction	52
2.2 Residual structures	52
2.3 The Bruck–Ryser–Chowla Theorem	55
2.4 Singer groups and difference sets	59
2.5 Multipliers	66
2.6 Arithmetical relations and Hadamard 2-designs	75
2.7 The Dembowski–Wagner Theorem	77
<b>3 Some families of symmetric designs</b>	
3.1 Introduction	83
3.2 Projective and affine planes	83
3.3 Latin squares	93
3.4 Nets	98
3.5 Hadamard matrices and Hadamard 2-designs	101
3.6 Biplanes	109
3.7 Strongly regular graphs	119

<b>4</b>	<b>3-Designs and related topics</b>	127
4.1	Introduction	127
4.2	Cameron's Theorem and Hadamard 3-designs	127
4.3	Inversive planes and a class of 3-designs	133
4.4	Hadamard designs, the little Mathieu designs and the little Mathieu groups	137
4.5	Some 4-designs and 5-designs	144
4.6	Tight designs	149
<b>5</b>	<b>Resolutions</b>	153
5.1	Introduction	153
5.2	Resolutions	153
5.3	Strong resolutions	159
5.4	Strongly resolvable designs	163
5.5	Examples of strongly resolvable designs	170
<b>6</b>	<b>Other 2-designs</b>	173
6.1	Introduction	173
6.2	Steiner triple systems	173
6.3	Unitals	176
6.4	Groups and more 2-designs	180
<b>7</b>	<b>Some 1-designs</b>	185
7.1	Introduction	185
7.2	Semilinear spaces and $\Gamma_x$ -geometries	186
7.3	Generalised quadrangles	193
7.4	Semisymmetric designs	196
7.5	Divisible semisymmetric designs	206
<b>8</b>	<b>The large Mathieu designs</b>	212
8.1	Introduction	212
8.2	Properties of a 5-(24, 8, 1)	213
8.3	Existence of $\mathcal{M}_{24}$	217
8.4	The Golay codes	225
8.5	The Mathieu groups	229
8.6	Some more combinatorics	233
	List of abbreviations	237
	Index	238
