|-------------------------------------------------------------------------|-----|
| Preface | VII |
| Chapter 1. Theta-Series | 1 |
| § 1.1. Definition of Theta-Series | 1 |
| 1.1.1. Representations of Quadratic Forms by Quadratic Forms | 1 |
| 1.1.2. Definition of Theta-Series | 3 |
| § 1.2. Symplectic Transformations | 4 |
| 1.2.1. The Symplectic Group | 4 |
| 1.2.2. The Siegel Upper Half-Plane | 7 |
| § 1.3. Symplectic Transformations of Theta-Series | 10 |
| 1.3.1. Transformations of Theta-Functions | 10 |
| 1.3.2. The Siegel Modular Group and the Theta-Group | 17 |
| 1.3.3. Symplectic Transformations of Theta-Series | 20 |
| § 1.4. Computation of the Multiplier | 26 |
| 1.4.1. Factors of Automorphy | 27 |
| 1.4.2. Quadratic Forms of Level 1 | 28 |
| 1.4.3. The Multiplier as a Gaussian Sum | 30 |
| 1.4.4. Quadratic Forms in an Even Number of Variables | 34 |
| 1.4.5. Quadratic Forms in an Odd Number of Variables | 40 |
| Chapter 2. Modular Forms | 43 |
| § 2.1. Fundamental Domains for Subgroups of the Modular Group | 43 |
| 2.1.1. The Modular Triangle | 43 |
| 2.1.2. The Minkowski Domain | 46 |
| 2.1.3. The Fundamental Domain for the Siegel Modular Group | 53 |
| 2.1.4. Subgroups of Finite Index | 60 |
| § 2.2. Definition of Modular Forms | 62 |
| 2.2.1. Congruence Subgroups of the Modular Group | 62 |
| 2.2.2. Modular Forms of Integral Weight | 62 |
| 2.2.3. Modular Forms of Half-Integral Weight | 63 |
| 2.2.4. Theta-Series as Modular Forms | 64 |
| § 2.3. Fourier Expansions | 64 |
| 2.3.1. Modular Forms for Triangular Subgroups | 64 |

| | |
|-------------------------------------------------------------------------------------------------|---------|
| 2.3.2. Koecher's Effect | 65 |
| 2.3.3. Fourier Expansions of Modular Forms | 69 |
| 2.3.4. The Siegel Operator | 74 |
| 2.3.5. Cusp Forms | 78 |
| 2.3.6. Singular Forms | 82 |
| § 2.4. Spaces of Modular Forms | 87 |
| 2.4.1. Zeroes of Modular Forms for Γ^1 | 88 |
| 2.4.2. Modular Forms Whose Initial Fourier Coefficients Equal Zero | 91 |
| 2.4.3. Dimension of Spaces of Modular Forms | 95 |
| § 2.5. Scalar Product and Orthogonal Decomposition | 96 |
| 2.5.1. Scalar Product | 97 |
| 2.5.2. Orthogonal Decomposition | 101 |
| Chapter 3. Hecke Rings | 105 |
| § 3.1. Abstract Hecke Rings | 105 |
| 3.1.1. Averaging over Double Cosets | 105 |
| 3.1.2. Hecke Rings | 106 |
| 3.1.3. The Imbedding i | 110 |
| 3.1.4. The Anti-Isomorphism j | 111 |
| 3.1.5. Representations on Automorphic Functions | 114 |
| 3.1.6. Hecke Rings over a Commutative Ring | 115 |
| § 3.2. Hecke Rings of the General Linear Group | 116 |
| 3.2.1. Global Rings | 116 |
| 3.2.2. Local Rings | 123 |
| 3.2.3. The Spherical Mapping | 129 |
| § 3.3. Hecke Rings of the Symplectic Group | 134 |
| 3.3.1. Global Rings | 134 |
| 3.3.2. Local Rings | 145 |
| 3.3.3. The Spherical Mapping | 150 |
| § 3.4. Hecke Rings of the Triangular Subgroup of the Symplectic Group | 168 |
| 3.4.1. Global Rings | 168 |
| 3.4.2. Local Rings | 175 |
| 3.4.3. Decomposition of Elements $T^n(a)$ for $n = 1, 2$ | 178 |
| § 3.5. Factorization of Symplectic Polynomials | 180 |
| 3.5.1. "Negative Powers" of Frobenius Elements | 180 |
| 3.5.2. Factorization of Symplectic Polynomials | 186 |
| 3.5.3. A Symmetric Factorization of Polynomials $\mathbf{Q}_p^n(v)$ for $n = 1, 2$ | 190 |
| 3.5.4. Coefficients of Factors of Polynomials $\mathbf{R}_p^n(v)$ | 192 |
| 3.5.5. A Symmetric Factorization of Polynomials $\mathbf{R}_p^n(v)$ | 208 |

| | |
|--------------------------------------------------------------------------------------------------------------|-----|
| Chapter 4. Hecke Operators | 212 |
| § 4.1. Hecke Operators for Congruence Subgroups of the Modular Group | 212 |
| 4.1.1. Hecke Operators | 212 |
| 4.1.2. Invariant Subspaces and Eigenfunctions | 216 |
| § 4.2. Action of Hecke Operators | 221 |
| 4.2.1. Hecke Operators for $\Gamma_0^n(q)$ | 221 |
| 4.2.2. Hecke Operators for Γ_0^n | 222 |
| 4.2.3. Relations with Hecke Operators for GL_n | 229 |
| 4.2.4. Hecke Operators and the Siegel Operator | 234 |
| 4.2.5. The Action of the Middle Factor of the Symmetric Factorization of Polynomials $R_p^n(v)$ | 242 |
| § 4.3. Multiplicative Properties of Fourier Coefficients | 252 |
| 4.3.1. Modular Forms of One Variable | 253 |
| 4.3.2. Modular Forms of Genus 2, Gaussian Composition, and Zeta-Functions | 264 |
| 4.3.3. Modular Forms of Arbitrary Genus and Even Zeta-Functions | 283 |
| Chapter 5. The Action of Hecke Operators on Theta-Series | 291 |
| § 5.1. The Action of Hecke Operators on Theta-Series | 292 |
| 5.1.1. Theta-Series and ε -Series | 292 |
| 5.1.2. The Basic Case | 299 |
| 5.1.3. The General Case | 306 |
| § 5.2. Theta-Matrices of Hecke Operators and Eichler Matrices | 310 |
| 5.2.1. The Comparison of Fourier Coefficients | 311 |
| 5.2.2. Theta-Matrices of Elements $T^n(p)$ | 314 |
| 5.2.3. Theta-Matrices of Coefficients of Even Local Zeta-Functions | 319 |
| 5.2.4. Theta-Matrices of Generators of Hecke Rings | 322 |
| 5.2.5. Relations, Relations | 325 |
| Appendix 1. Symmetric Matrices over Fields | 330 |
| A.1.1. Arbitrary Fields | 330 |
| A.1.2. The Field \mathbb{R} | 331 |
| Appendix 2. Quadratic Spaces | 334 |
| A.2.1. The Geometric Language | 334 |
| A.2.2. Non-Degenerate Spaces | 338 |
| A.2.3. Gaussian Sums | 339 |
| A.2.4. Isotropic Subspaces of Non-Degenerate Spaces over the Fields \mathbb{F}_p | 342 |
| A.2.5. Non-Singular Spaces over Residue Class Rings | 345 |
| A.2.6. The Genus of Quadratic Spaces over \mathbb{Z} | 348 |

Appendix 3. Modules in Quadratic Fields and Binary
Quadratic Forms 350

 A.3.1. Modules of Algebraic Number Fields 350

 A.3.2. Modules in Quadratic Fields and Prime Numbers 351

 A.3.3. Modules in Imaginary Quadratic Fields and
 Quadratic Forms 356

Notes 360

 On Chapter 1 360

 On Chapter 2 360

 On Chapter 3 361

 On Chapter 4 362

 On Chapter 5 363
