

Contents

Introduction	vii
I. Relative Quadratic Extensions	3
1. Extension of primes	3
2. Hilbert symbols	8
3. The group $\text{Gen}(E/F)$	10
4. The group $\text{Iso}(E/F)$	16
5. The unramified case	21
6. Examples	25
II. The Witt Ring $H(E)$	35
1. General definitions	35
2. Anisotropic representatives	39
3. Invariants for $H(E)$	42
4. Algebraic number fields	47
III. Torsion Forms	54
1. Torsion O_E -modules	54
2. The quotient E/K	55
3. Torsion innerproducts	59
4. Localizers	67
5. The inverse different	69
IV. The Group $H_u(K)$	75
1. Basic definitions	75
2. The group $\text{Iso}(E/F)$ again	79
3. The Knebusch exact sequence	82
4. Localization	89
5. Computing $H_u(K)$	95
6. The ring $H(O_E)$	102
7. The Cokernel of δ	113
V. The Witt Ring $W(O_F)$	120
1. Symbols	120
2. The boundary operator	129
3. The ring $W(O_F)$	135
References	142
Symbol List	143
