INTRODUCTION.

	PAGE.
Introduction	1
Imaginary Quantities	2
Exponentials	9
Explanation of Figures and Tables	12
Analytical Trigonometry	14
Interrelations	16
Integration	18
Classification	21

CHAPTER I.

Trigonometric Differentials.

Arts.

1. Trigonometric Formulae	27
2. Trigonometric Differentials	29
3-8. Integration of $dy = \cos^m x \sin^n x dx$	30
3. When either m or n is an odd positive integer	30
4. When $m + n$ is an even negative integer	31
5. When both m and n are even positive integers	32
7. When $m + n$ is an odd negative integer	34
8. When either m or n is an even positive integer, the other being a negative integer, and $m + n$ is a positive integer or zero	39
9. Integration of $dy = \cos mx \cos nx dx$, $dy = \sin mx \cos nx dx$, and $dy = \sin mx \sin nx dx$	41
10-12. Integration of $dy = e^{ax} \cos bx dx$, $dy = e^{ax} \sin bx dx$	42
Miscellaneous Examples I	46

CHAPTER II.

Rationalization by Trigonometric Substitution.

Arts.		PAGE.
13.	Introduction	47
14.	Rationalization of Expressions containing $\sqrt{a^2 + x^2}$	47
15.	“ “ “ “ $\sqrt{a^2 - x^2}$	49
16.	“ “ “ “ $\sqrt{x^2 - a^2}$	50
17.	Change of Form of Radical	52
	Miscellaneous Examples II.	58
18.	Rationalization of Expressions Containing $\sqrt{2ax - x^2}$	59
19.	“ “ “ “ $\sqrt{2ax + x^2}$	60
20.	“ “ “ “ trinomial surds	62
21.	Binomial Differentials	63
	Answers to Examples	65
