Contents

1. Natural Group Structure in Π (A, B) 1

2. Suspension and Loop Space 7

3. The Category of Pairs 11

4. Exact Sequences 21

5. Universal Coefficient Theorem for Homotopy Groups . . 29

6. Induced Fibre and Cofibre Maps 33

7. Fibrations with Fibre an Eilenberg-MacLane Space and the Dual Question 43

8. Homology Decomposition of a 1-Connected Polyhedron . 53
   Appendix to Chapter 8 66

9. Exact Sequences in the Category of Pairs 69

10. Homology and Homotopy Decompositions of Maps . . 87

11. Examples of Duality 95

12. Homotopy Operations 107
    Appendix to Chapter 12. Computations 123

13. Homotopy Theory of Modules 131

14. The Duality in a Category with Sums and Products . . 161

15. Applications of Operators and Cooperators 171

16. Cohomology and Homotopy Products 185

17. Further Applications of Operators and Cooperators . . 201

Bibliography 219
