*Editor's Preface*

*Authors' Preface*

*List of Symbols*

1	Vectors and Vector Quantities	1
	Introduction	1
1.1	Mathematical models	1
1.2	The need for vectors	2
1.3	Directed line segments	3
1.4	Position vectors	5
1.5	Worked example	7
1.6	Scalar multiples	8
1.7	Properties of scalar multiples	10
1.8	Worked example	11
1.9	Vector quantities and vectors	12
1.10	Angle	14
1.11	Applications	15
1.12	The triangle inequality	19
1.13	Bound vectors	21
1.14	Localized line vectors	22
1.15	Miscellaneous exercises	29
2	Linear Combinations and Column Vectors	31
	Introduction	31
2.1	Linear combinations	31
2.2	Spanning sets	31
2.3	Linear dependence and independence	32
2.4	Linear dependence and independence in $V_3$	35
2.5	Column vectors	36
2.6	Properties of column vectors	38
2.7	Linear dependence and independence in $R^3$	40
2.8	The subspace $R^2$	43
2.9	Miscellaneous exercises	46
3	Introduction to Dynamics	47
3.1	Scalar displacement, velocity and acceleration	47

3.2	Worked examples	49
3.3	Vector functions	51
3.4	Differentiation of vector functions	52
3.5	Differentiation of vector functions of time	54
3.6	Differentiation of linear combinations	55
3.7	Integration of vector functions	57
3.8	Worked examples	58
3.9	Miscellaneous exercises	61
4	Vector Geometry (i)	62
4.1	The bound vector $\mathbf{PQ}$	62
4.2	The section formula	63
4.3	Conditions for collinearity	67
4.4	Applications to Euclidean geometry	69
4.5	The centroid of a triangle	71
4.6	The equation of a straight line	75
4.7	The equation of a plane	76
4.8	Worked examples	77
4.9	Miscellaneous exercises	79
5	Coordinate Systems	81
5.1	Polar coordinates	81
5.2	Radial and transverse unit vectors	85
5.3	Plane Cartesian coordinates	87
5.4	Three-dimensional Cartesian coordinates	89
5.5	Cylindrical polar coordinates	93
5.6	Spherical polar coordinates	94
5.7	Miscellaneous exercises	95
6	Relative Velocity	96
6.1	Linear motion	96
6.2	Relative velocity law	98
6.3	Worked examples	99
6.4	Miscellaneous exercises	104
7	Forces (i)	107
	Introduction	107
7.1	Representation of forces by directed line segments	107
7.2	Forces on a particle	108
7.3	Equilibrium	112
7.4	Components of forces	112
7.5	Forces on particles	114
7.6	Forces on bodies	115
7.7	Worked examples	118
8	Forces (ii)	121
8.1	Newton's second law	121
8.2	Weight	123
8.3	The constant acceleration formulae	124

8.4	Applications of Newton's second law	126
8.5	Hooke's law	131
8.6	Acceleration in systems	134
8.7	Miscellaneous exercises	136
9	Projectiles	138
9.1	Velocity and acceleration	138
9.2	Projectiles	141
9.3	Worked examples	143
9.4	Miscellaneous exercises	150
10	The Scalar Product	152
10.1	Work and power	152
10.2	Scalar product of two vectors	154
10.3	Other types of vector	155
10.4	Examples using scalar products	155
10.5	Properties of the scalar product	157
10.6	Orthogonality	160
10.7	Scalar products in $R^3$	161
10.8	Worked examples	161
10.9	Miscellaneous exercises	163
11	Impulse and Momentum	165
11.1	The impulse–momentum integral	165
11.2	Conservation of momentum	166
11.3	Worked examples	167
11.4	Coalescence of particles on impact	169
11.5	Particles rebounding on impact	173
11.6	Continuous change of momentum	178
11.7	Miscellaneous exercises	180
12	The Vector Product	182
12.1	Vector product of two vectors	182
12.2	Properties of the vector product	183
12.3	Further properties of the vector product	185
12.4	Coordinate form of the vector product	187
12.5	Miscellaneous exercises	190
13	Vector Geometry (ii)	192
	Introduction	192
13.1	The section formula	193
13.2	The Cartesian equations of a straight line in three dimensions	195
13.3	The angle between two column vectors	199
13.4	Orthogonal matrices	201
13.5	The equation of a plane	202
13.6	Further properties of straight lines	207
13.7	Geometry with products of vectors	209
13.8	Conics	211

13.9	Surfaces	216
13.10	Miscellaneous exercises	218
14	Work, Energy and Power	222
14.1	Work and energy	222
14.2	The energy integral	224
14.3	Worked examples	226
14.4	Energy in strings and springs	230
14.5	Loss of energy on impact	233
14.6	Power	235
14.7	Worked examples	235
14.8	Further worked examples	238
14.9	Miscellaneous exercises	239
	Answers to exercises	241
	Bibliography	254
	Index	257
