| Preface | xiii |
| Foreword to the Student | xv |

INTRODUCTION

| | | |
|----------|------------------------------|-----------|
| 1 | EQUIVALENCE RELATIONS | 2 |
| 1.1 | Logic | 2 |
| 1.2 | Sets | 4 |
| 1.3 | Relations | 5 |
| 1.4 | Exercises | 8 |
| | Graffiti | 9 |
| 2 | MAPPINGS | 10 |
| 2.1 | One-to-One and Onto | 10 |
| 2.2 | Composition of Mappings | 15 |
| 2.3 | Exercises | 17 |
| | Graffiti | 19 |
| 3 | THE REAL NUMBERS | 20 |
| 3.1 | Binary Operations | 20 |
| 3.2 | Properties of the Reals | 26 |
| 3.3 | Exercises | 31 |
| | Graffiti | 33 |

| | | |
|-----------------------------------|--|-----------|
| 4 | AXIOM SYSTEMS | 34 |
| 4.1 | Axiom Systems | 34 |
| 4.2 | Incidence Planes | 36 |
| 4.3 | Exercises | 45 |
| | Graffiti | 47 |
| | | |
| PART ONE ABSOLUTE GEOMETRY | | |
| 5 | MODELS | 50 |
| 5.1 | Models of the Euclidean Plane | 50 |
| 5.2 | Models of Incidence Planes | 55 |
| 5.3 | Exercises | 61 |
| | Graffiti | 64 |
| 6 | INCIDENCE AXIOM AND RULER POSTULATE | 65 |
| 6.1 | Our Objectives | 65 |
| 6.2 | Axiom 1: The Incidence Axiom | 66 |
| 6.3 | Axiom 2: The Ruler Postulate | 68 |
| 6.4 | Exercises | 70 |
| | Graffiti | 72 |
| 7 | BETWEENNESS | 73 |
| 7.1 | Ordering the Points on a Line | 73 |
| 7.2 | Taxicab Geometry | 77 |
| 7.3 | Exercises | 81 |
| | Graffiti | 82 |
| 8 | SEGMENTS, RAYS, AND CONVEX SETS | 84 |
| 8.1 | Segments and Rays | 84 |
| 8.2 | Convex Sets | 89 |
| 8.3 | Exercises | 92 |
| | Graffiti | 93 |
| 9 | ANGLES AND TRIANGLES | 95 |
| 9.1 | Angles and Triangles | 95 |
| 9.2 | More Models | 100 |
| 9.3 | Exercises | 109 |
| | Graffiti | 110 |

| | | |
|-----------|---|------------|
| 10 | THE GOLDEN AGE OF GREEK MATHEMATICS | 111 |
| | (Optional) | |
| 10.1 | Alexandria | 111 |
| 10.2 | Exercises | 119 |
| 11 | EUCLID'S ELEMENTS (Optional) | 121 |
| 11.1 | The Elements | 121 |
| 11.2 | Exercises | 129 |
| | Graffiti | 130 |
| 12 | PASCH'S POSTULATE AND PLANE SEPARATION POSTULATE | 131 |
| 12.1 | Axiom 3: PSP | 131 |
| 12.2 | Pasch, Peano, Pieri, and Hilbert | 137 |
| 12.3 | Exercises | 140 |
| | Graffiti | 142 |
| 13 | CROSSBAR AND QUADRILATERALS | 144 |
| 13.1 | More Incidence Theorems | 144 |
| 13.2 | Quadrilaterals | 149 |
| 13.3 | Exercises | 152 |
| | Graffiti | 153 |
| 14 | MEASURING ANGLES AND THE PROTRACTOR POSTULATE | 155 |
| 14.1 | Axiom 4: The Protractor Postulate | 155 |
| 14.2 | Peculiar Protractors | 166 |
| 14.3 | Exercises | 169 |
| 15 | ALTERNATIVE AXIOM SYSTEMS (Optional) | 172 |
| 15.1 | Hilbert's Axioms | 172 |
| 15.2 | Pieri's Postulates | 175 |
| 15.3 | Exercises | 180 |
| 16 | MIRRORS | 182 |
| 16.1 | Rulers and Protractors | 182 |
| 16.2 | MIRROR and SAS | 184 |
| 16.3 | Exercises | 189 |
| | Graffiti | 191 |

| | | |
|-----------|--|------------|
| 17 | CONGRUENCE AND THE PENULTIMATE POSTULATE | 192 |
| 17.1 | Congruence for Triangles | 192 |
| 17.2 | Axiom 5: SAS | 195 |
| 17.3 | Congruence Theorems | 198 |
| 17.4 | Exercises | 201 |
| | Graffiti | 202 |
| 18 | PERPENDICULARS AND INEQUALITIES | 204 |
| 18.1 | A Theorem on Parallels | 204 |
| 18.2 | Inequalities | 207 |
| 18.3 | Right Triangles | 211 |
| 18.4 | Exercises | 213 |
| | Graffiti | 215 |
| 19 | REFLECTIONS | 216 |
| 19.1 | Introducing Isometries | 216 |
| 19.2 | Reflection in a Line | 219 |
| 19.3 | Exercises | 223 |
| | Graffiti | 225 |
| 20 | CIRCLES | 226 |
| 20.1 | Introducing Circles | 226 |
| 20.2 | The Two-Circle Theorem | 230 |
| 20.3 | Exercises | 236 |
| | Graffiti | 238 |
| 21 | ABSOLUTE GEOMETRY AND SACCHERI QUADRILATERALS | 239 |
| 21.1 | Euclid's Absolute Geometry | 239 |
| 21.2 | Giordano's Theorem | 248 |
| 21.3 | Exercises | 252 |
| | Graffiti | 253 |
| 22 | SACCHERI'S THREE HYPOTHESES | 255 |
| 22.1 | Omar Khayyam's Theorem | 255 |
| 22.2 | Saccheri's Theorem | 260 |
| 22.3 | Exercises | 266 |
| | Graffiti | 267 |

| | | |
|--|---|------------|
| 23 | EUCLID'S PARALLEL POSTULATE | 269 |
| | 23.1 Equivalent Statements | 269 |
| | 23.2 Independence | 281 |
| | 23.3 Exercises | 286 |
| | Graffiti | 289 |
| 24 | BIANGLES | 292 |
| | 24.1 Closed Bingles | 292 |
| | 24.2 Critical Angles and Absolute Lengths | 295 |
| | 24.3 The Invention of Non-Euclidean Geometry | 302 |
| | 24.4 Exercises | 314 |
| | Graffiti | 316 |
| 25 | EXCURSIONS | 317 |
| | 25.1 Prospectus | 317 |
| | 25.2 Euclidean Geometry | 320 |
| | 25.3 Higher Dimensions | 323 |
| | 25.4 Exercises | 328 |
| | Graffiti | 330 |
| PART TWO NON-EUCLIDEAN GEOMETRY | | |
| 26 | PARALLELS AND THE ULTIMATE AXIOM | 334 |
| | 26.1 Axiom 6: HPP | 334 |
| | 26.2 Parallel Lines | 338 |
| | 26.3 Exercises | 344 |
| | Graffiti | 346 |
| 27 | BRUSHES AND CYCLES | 347 |
| | 27.1 Brushes | 347 |
| | 27.2 Cycles | 351 |
| | 27.3 Exercises | 356 |
| | Graffiti | 358 |
| 28 | ROTATIONS, TRANSLATIONS, AND HOROLATIONS | 360 |
| | 28.1 Products of Two Reflections | 360 |
| | 28.2 Reflections in Lines of a Brush | 365 |
| | 28.3 Exercises | 368 |
| | Graffiti | 370 |

| | | |
|-----------|---|------------|
| 29 | THE CLASSIFICATION OF ISOMETRIES | 371 |
| 29.1 | Involutions | 371 |
| 29.2 | The Classification Theorem | 378 |
| 29.3 | Exercises | 382 |
| | Graffiti | 384 |
| 30 | SYMMETRY | 386 |
| 30.1 | Leonardo's Theorem | 386 |
| 30.2 | Frieze Patterns | 392 |
| 30.3 | Exercises | 397 |
| | Graffiti | 400 |
| 31 | HOROCIRCLES | 402 |
| 31.1 | Length of Arc | 402 |
| 31.2 | Hyperbolic Functions | 415 |
| 31.3 | Exercises | 417 |
| | Graffiti | 419 |
| 32 | THE FUNDAMENTAL FORMULA | 421 |
| 32.1 | Trigonometry | 421 |
| 32.2 | Complementary Segments | 434 |
| 32.3 | Exercises | 439 |
| | Graffiti | 443 |
| 33 | CATEGORICALNESS AND AREA | 444 |
| 33.1 | Analytic Geometry | 444 |
| 33.2 | Area | 450 |
| 33.3 | Exercises | 459 |
| | Graffiti | 463 |
| 34 | QUADRATURE OF THE CIRCLE | 464 |
| 34.1 | Classical Theorems | 464 |
| 34.2 | Calculus | 474 |
| 34.3 | Constructions | 479 |
| 34.4 | Exercises | 490 |
| • | Hints and Answers | 494 |
| | Notation Index | 503 |
| | Index | 504 |
