|---|-----|
| PREFACE | vii |
| INTRODUCTION: FLOWS AND DIFFEOMORPHISMS | 1 |
| 1. Time-one maps | 2 |
| 2. Cross-sections and Suspensions | 3 |
| 0. PRELIMINARIES | 7 |
| 0.1 Function spaces | 7 |
| 0.2 The "Generic" Viewpoint | 18 |
| 0.3 A Quick Survey of Transversality Theory | 25 |
| 1. THE CIRCLE | 32 |
| 1.1 The Classical Theory | 32 |
| 1.2 The Generic Theory | 50 |
| 1.3 Expanding Maps | 59 |
| 2. PERIODIC POINTS | 68 |
| 2.0 Lipschitz Functions | 68 |
| 2.1 Local Behavior of Periodic Points | 71 |
| 2.2 Perturbations of Periodic Points | 81 |
| 2.3 Morse-Smale Systems | 88 |
| 3. ANOSOV DIFFEOMORPHISMS | 95 |
| 3.1 Hyperbolic Toral Automorphisms | 96 |
| 3.2 The Anosov Stability Theorem | 102 |
| 3.3 General Questions | 111 |
| 4. THE HORSESHOE | 118 |
| 4.1 The Shift Automorphism | 119 |
| 4.2 Definition of the Horseshoe | 123 |
| 4.3 Formal Analysis of $\Omega(f)$ | 131 |
| 4.4 Linear Theory | 138 |
| 4.5 Perturbations of f | 141 |
| 4.6 Homoclinic Points | 151 |
| 5. HYPERBOLIC SETS | 159 |
| 5.1 Definition and the Stability Theorem | 160 |
| 5.2 Stable Manifold Theory for a Point | 164 |
| 5.3 Stable Manifold Theory for a Hyperbolic Set | 179 |

| | | |
|--------------|--|-----|
| 6. | THE Ω -STABILITY THEOREM | 189 |
| 6.1 | Spectral Decomposition | 190 |
| 6.2 | Local Structure of Ω_i | 199 |
| 6.3 | Ω -Explosions | 206 |
| 6.4 | The No-Cycle Property and Filtration | 215 |
| 6.5 | Global Stability | 224 |
| 7. | A SURVEY OF RECENT WORK | 226 |
| 7.1 | Stability Questions | 226 |
| 7.2 | Analysis of Invariant Sets | 234 |
| 7.3 | Other Areas | 240 |
| Appendix I | ENDOMORPHISMS OF THE CIRCLE | 244 |
| Appendix II | THE KUPKA-SMALE THEOREM | 256 |
| Appendix III | PERIODIC POINTS OF TORAL AUTOMORPHISMS | 260 |
| Appendix IV | OPENNESS OF ANOSOV DIFFEOMORPHISMS | 262 |
| BIBLIOGRAPHY | | 267 |
| INDEX | | 279 |
