

Table of contents

Notations	x
Chapter 1 <u>Partial Differentiation</u>	
1.1 Partial Derivatives	1
1.2 Differentiability, Chain Rule	4
1.3 Taylor's Theorem	9
Chapter 2 <u>Differential Forms</u>	15
2.1 Line Integrals	19
2.2 One Forms	22
2.3 Wedge Product	30
2.4 Change of Coordinates	
Chapter 3 <u>Integration in Higher Dimensions</u>	37
3.1 Jacobians	48
3.2 Implicit Function Theorem	59
3.3 Manifolds	67
3.4 Integration on Manifolds	
Chapter 4 <u>Exterior Differentiation</u>	74
4.2 Exterior Derivative	81
4.2 Fundamental Theorem of Calculus	89
4.3 Closed Forms	93
4.4 Exact Forms	
Chapter 5 <u>Vector Operations in \mathbb{R}^3</u>	97
5.1 Nabla	104
5.2 Higher Derivatives	111
5.3 Integral Formulae	
Chapter 6 <u>Extremals</u>	117
6.1 Generic Extremals	122
6.2 Extremals with Constraints	
Chapter 7 <u>Integral Geometry</u>	126
7.1 Measure of Points and Lines	130
7.2 Kinematic Measure	133
7.3 Formulae of Poincaré and Blaschke	
Appendix	
1. The Volume Element on a Manifold	140
2. The Algebra of Forms	144
3. A Remark on Curl Curl	145
Bibliography	147
