

# CONTENTS

<i>Contributors</i>	xi
<i>Preface</i>	xiii
<i>Acknowledgments</i>	xv
An example concerning the preservation of the Lindelöf property in product spaces <i>K. Alster and P. Zenor</i>	1
Closed-completeness in spaces with a quasi- $G_\delta$ diagonal <i>Robert L. Blair</i>	11
Closed-completeness in spaces with weak covering properties <i>Robert L. Blair</i>	17
$z$ -embedding in $\beta X \times \beta Y$ <i>Robert L. Blair and Anthony W. Hager</i>	47
A note on $\delta\theta$ -refinable spaces <i>James R. Boone</i>	73
On countably compact extensions of normal locally compact M-spaces <i>Dennis K. Burke and Eric K. van Douwen</i>	81
A characterization of continuously semimetrizable spaces <i>H. Cook</i>	91
Density of compactifications <i>Eric K. van Douwen</i>	97

The Pixley–Roy topology on spaces of subsets <i>Eric K. van Douwen</i>	111
Separating closed discrete collections of singular cardinality <i>William G. Fleissner</i>	135
Open mapping theory <i>Raymond F. Gittings</i>	141
Moore-closed and locally Moore-closed spaces <i>John Wm. Green</i>	193
A construction of a quasi-metric Souslin space with a point-countable base <i>R. W. Heath</i>	219
On generating non-orthocompact spaces <i>R. W. Heath and W. F. Lindgren</i>	225
The Alexandroff–Urysohn metrization theorem revisited <i>R. E. Hodel</i>	239
$G(m)$ -spaces and related topics <i>Thomas R. James</i>	255
Strong S and L spaces under MA <i>Kenneth Kunen</i>	265
A selection-theoretic approach to certain extension theorems <i>David J. Lutzer</i>	269
Some surprising base properties in topology II <i>Peter J. Nyikos</i>	277
Some results from A-spaces <i>R. C. Olson</i>	307
Some observations on semicompletable Moore spaces <i>Thomas M. Phillips</i>	313

Normality and separability of Moore spaces <i>Teodor C. Przymusiński</i>	325
Orthocompactness is normality in finite products of locally compact LOTS's <i>Brian M. Scott</i>	339
A reduction of the hereditarily separable non-Lindelöf problem <i>Franklin D. Tall</i>	349
First countable spaces with caliber $\aleph_1$ may or may not be separable <i>Franklin D. Tall</i>	353
Some examples concerning $\alpha$ -bounded spaces <i>J. E. Vaughan</i>	359
Non-normal spaces <i>Michael L. Wage</i>	371
Complete mappings in base of countable order theory <i>H. H. Wicke</i>	383
Locally separable Moore spaces <i>John M. Worrell, Jr.</i>	413
