Preface	vii
CHAPTER 1 TOPOLOGICAL BACKGROUND	
1.1 Sets and functions	1
1.2 Continuous functions	3
1.3 Topological spaces	6
1.4 Some special topological spaces	8
CHAPTER 2 DIFFERENTIABLE MANIFOLDS	
2.1 Some classical theory of differentiable functions	12
2.2 Differentiable manifolds	14
2.3 Differentiable functions	20
2.4 The induced topology on a manifold	22
2.5 Differentiable varieties	25
2.6 Grassmann manifolds	28
CHAPTER 3 THE TOPOLOGY OF A MANIFOLD	
3.1 Manifold structure on a topological space	34
3.2 Properties of the induced topology	38
3.3 Topological restrictions on a manifold	41
3.4 Partitions of unity	46
CHAPTER 4 DIFFERENTIATION ON A MANIFOLD	
4.1 Partial differentiation	53
4.2 Tangent vectors	54
4.3 Derived linear functions	57
4.4 The Inverse Function Theorem	63
4.5 Leibniz's Formula	66
CHAPTER 5 SUBMANIFOLDS	
5.1 Immersions	68
5.2 General properties of immersions	70

5.3	Submanifolds	72
5.4	Regular submanifolds	75
5.5	Some topological properties of submanifolds	79
5.6	An imbedding theorem	81

## CHAPTER 6 QUOTIENT MANIFOLDS

6.1	Submersions	84
6.2	The fibres of a submersion	88
6.3	Quotient manifolds	91
6.4	Transformation groups	95
6.5	Discontinuous transformation groups	97
6.6	Fundamental domains	101
6.7	Examples of quotient manifolds	104

## CHAPTER 7 VECTOR FIELDS

7.1	Definition and characteristic properties	109
7.2	The tangent bundle	113
7.3	Independent vector fields	116
7.4	Orientable manifolds	119
7.5	$\phi$ -related vector fields	125

## CHAPTER 8 DIFFERENTIAL EQUATIONS OF FIRST ORDER

8.1	Definitions and examples	131
8.2	Maximal integral curves	135
8.3	The flow of a vector field	139
8.4	Differential equations on a quotient manifold	142
8.5	Eigenvalues of a vector field	146

## CHAPTER 9 LINEAR CONNECTIONS

9.1	Definitions and characteristic properties	152
9.2	The curvature and torsion of a linear connection	155
9.3	The horizontal distribution	159
9.4	Riemannian connections	161

## CHAPTER 10 DIFFERENTIAL EQUATIONS OF SECOND ORDER

10.1	Definitions and basic properties	169
------	----------------------------------	-----

10.2	Sprays	171
10.3	Sprays on a parallelizable manifold	173
10.4	The Riemannian spray	176
10.5	The Exponential mapping for a spray	178
10.6	The metric structure on a Riemannian manifold	183

## CHAPTER 11 DISTRIBUTIONS

11.1	Definitions and examples	193
11.2	Frobenius' Theorem	194
11.3	Integral manifolds of a distribution	198
11.4	Regular distributions	204
11.5	An application to linear connections	207

## CHAPTER 12 LIE GROUPS

12.1	Definitions and examples	210
12.2	Some topological properties of Lie groups	212
12.3	Lie subgroups	215
12.4	The Lie algebra of a Lie group	218
12.5	Lie subgroups and Lie algebras	222
12.6	The exponential mapping for a Lie group	226
12.7	A special chart of a Lie group	229
12.8	Closed connected Lie subgroups	231
12.9	Closed subgroups of a Lie group	234

## CHAPTER 13 LIE TRANSFORMATION GROUPS

13.1	Definition and examples	241
13.2	A Lie algebra of vector fields	244
13.3	Orbits under a Lie transformation group	249
13.4	Groups of transformations of a Hausdorff manifold	254
13.5	An Exponential mapping	257
13.6	Automorphisms of a parallelization	263
13.7	The Lie algebra of $G$	275
	References	281
	Bibliography	283
	Index	285
