PREFACE	ix
---------------	----

PART 1

I. Symmetry

1.1. <i>Symmetry Operations</i>	3
1.2. <i>Definition of a Group</i>	7
1.3. <i>Symmetry in Nature</i>	9

II. Theory of Groups

2.1. <i>Further Definitions</i>	12
2.2. <i>Subgroups</i>	14
2.3. <i>Classes</i>	14
2.4. <i>Matrices</i>	18
2.5. <i>Matrices and the Symmetry Operations of the Square</i> ..	19
2.6. <i>Matrix Representations of a Group</i>	21
2.7. <i>Irreducible (Matrix) Representations of a Group</i>	26
2.8. <i>The Deduction of the Irreducible Representations of a Group</i>	28
2.9. <i>The Direct Product of Two Groups</i>	36
2.10. <i>Group Theory and Quantum Mechanics, Wigner's The- orem</i>	38

III. Crystallographic Groups

3.1. <i>Point Groups</i>	42
3.2. <i>The Derivation of the Point Groups and their Character Tables</i>	46
3.3. <i>The Basis of a Representation</i>	52
3.4. <i>Bravais Lattices</i>	56
3.5. <i>Space Groups</i>	59
3.6. <i>Seitz Space-group Symbols</i>	61

IV. The Rotation, Symmetric and Lorentz Groups

4.1.	<i>The Rotation Group</i>	66
4.2.	<i>The Representations of the Rotation Group</i>	70
4.3.	<i>The Spherical Harmonics and the Rotation Group</i>	75
4.4.	<i>The Permutation Group, or Symmetric Group, $S(n)$</i> ...	79
4.5.	<i>Young's Tableaux</i>	81
4.6.	<i>Special Relativity and the Lorentz Group</i>	85

V. Vibrations in Molecules and Solids

5.1.	<i>Vibrations of Molecules, Normal Modes</i>	91
5.2.	<i>Example, the Normal Modes of the Methane Molecule</i>	92
5.3.	<i>Vibrations of Solids, Phonons</i>	107
5.4.	<i>Brillouin Zone Theory</i>	110
5.5.	<i>Infra-red and Raman Activity of the Normal Modes</i> ...	113

VI. Electronic States in Atoms, Molecules and Solids

6.1.	<i>Wave Functions of Electrons in Atoms</i>	119
6.2.	<i>Wave Functions of Electrons in Molecules</i>	122
6.3.	<i>The Jahn-Teller Effect</i>	131
6.4.	<i>The Splitting of Atomic Energy Levels in Crystals</i>	132
6.5.	<i>Wave Functions of Electrons in Solids</i>	137

VII. Atoms, Nuclei and Elementary Particles

7.1.	<i>The Principle of Antisymmetry and the Pauli Exclusion Principle</i>	143
7.2.	<i>The Spherical Harmonics and Angular Momentum</i>	145
7.3.	<i>Selection Rules for Electrons in Atoms</i>	148
7.4.	<i>Spin, $SU(2)$</i>	153
7.5.	<i>Nuclei, Isobaric Spin</i>	156
7.6.	<i>"Elementary" Particles, $SU(3)$, etc.</i>	161

VIII. Further Topics

8.1.	<i>Double Groups</i>	169
8.2.	<i>Magnetic Point Groups and Magnetic Space Groups</i> ...	173
8.3.	<i>Time Reversal and the Kramers Degeneracy</i>	179

8.4. <i>Symmetry Properties of Tensors</i>	181
8.5. <i>Waveguide Junctions</i>	185
8.6. <i>Campanological Groups</i>	189

GUIDED BIBLIOGRAPHY	192
---------------------------	-----

REFERENCES	193
------------------	-----

PART 2

1. <i>The Elastic Characteristic Vibrations of Symmetrical Systems</i> , by E. WIGNER	199
2. <i>The Degeneracy, Selection Rules, and Other Properties of the Normal Vibrations of Certain Polyatomic Molecules</i> , by E. B. WILSON	213
3. <i>Stability of Polyatomic Molecules in Degenerate Electronic States. I</i> , by H. A. JAHN and E. TELLER	233
4. <i>Splitting of Terms in Crystals</i> , by H. A. BETHE	256
5. <i>On the Reduction of Space Groups</i> , by F. SEITZ	297
6. <i>Theory of Brillouin Zones and Symmetry Properties of Wave Functions in Crystals</i> , by L. P. BOUCKAERT, R. SMOLUCHOWSKI and E. WIGNER	314
7. <i>On the Consequences of the Symmetry of the Nuclear Hamiltonian on the Spectroscopy of Nuclei</i> , by E. WIGNER	339
8. "Double" Crystallographic Groups, by W. OPECHOWSKI.	370
9. <i>Magnetic Symmetry of Crystals</i> , by B. A. TAVGER and V. M. ZAITSEV	379

APPENDIX. The Character Tables of the Thirty-two Point Groups	392
---	-----

HINTS TO SOLUTIONS OF THE EXERCISES	397
