

CONTENTS

CHAPTER ONE The General Topological Structure 1

1. **Basic Hausdorff Neighborhood Relations on Sets.** 1
 2. **Equivalent Basic Neighborhood Relations. Neighborhood Relations. Derived Set.** 5
 3. **Closure. Closed Sets. Open Sets.** 14
 4. **Continuous Functions.** 29
 5. **Countable Bases and Local Bases.** 33
 6. **Homeomorphisms. Topological Invariants.** 36
 7. **Convergence in a Topological Space.** 39
- Summary For Chapter 1** 50

CHAPTER TWO Generation of Spaces 51

8. **Different Topologies on the Same Set.** 51
 9. **Subspaces. The Relative Topology.** 54
 10. **Topologies Defined by Functions.** 60
 11. **Product of a Finite Number of Spaces.** 65
 12. **General Product Spaces. Cantor Ternary Space. Function Spaces.** 72
 13. **Quotient Spaces (Decomposition Spaces).** 91
- Summary for Chapter 2** 97

CHAPTER THREE Separation Axioms 99

14. **T_0 -Spaces.** 99
 15. **T_1 -Spaces.** 101
 16. **Hausdorff Spaces (T_2 -Spaces).** 103
 17. **Regular Spaces.** 113
 18. **Normal Spaces. Completely Regular Spaces.** 118
- Summary for Chapter 3** 139

CHAPTER FOUR Metrizable Spaces and Uniformizable Spaces 141

- 19. Metrics and Metrizable Spaces. 141
- 20. Countability and Separability for Metrizable Spaces. 148
- 21. Examples of Important Metrizable Spaces. 155
- 22. Metric Spaces. Category. A Fixed Point Theorem. 170
- 23. Metric Uniform Continuity. Uniformizable Spaces. Uniform Convergence. Uniform Spaces. 182
- Summary for Chapter 4 208

CHAPTER FIVE Connectedness 210

- 24. Definitions of Connectedness. Basic Theorems. 211
- 25. Connected Sets in E^1 . The Intermediate Value Theorem. 218
- 26. Components. Quasi-Components. Cut Points. 223
- 27. Local Connectedness. Pathwise Connectedness. 231
- Summary for Chapter 5 239

CHAPTER SIX Compactness 241

- 28. Compactness and Countable Compactness. 241
- 29. Compactness in Hausdorff Spaces. 261
- 30. Compactness in Metrizable Spaces and in Uniform Spaces. 275
- 31. Local Compactness and Compactifications. 298
- 32. Curves. 313
- 33. Paracompactness. 337
- Summary for Chapter 6 357

CHAPTER SEVEN Homotopy 361

- 34. The Basic Homotopy Equivalences. 361
- 35. The Fundamental Groupoid and the Fundamental Group. 369
- 36. Function Spaces. Path Spaces. Higher Homotopy Groups. 391
- Summary for Chapter 7 411

Notations and Conventions 413
