PREFACE . . . . .	v
SYMBOLS . . . . .	vi
CHAPTER I. RECURSIVE CONVERGENCE . . . . .	1
Primitive and general recursive functions	
Recursive arithmetic and its extensions	
Recursive convergence and relative convergence	
The reduced sequence	
Recursive limits and tests for recursive convergence	
Primitive and general recursive real numbers	
CHAPTER II. RECURSIVE AND RELATIVE CONTINUITY . . . . .	39
Uniform and doubly uniform equivalents of a relatively continuous recursive function	
Upper and lower bounds and the impossibility of a proof of their attainment	
Conditions which ensure that a relatively continuous function vanishes if it changes sign, and the non-existence of a recursive root in the general case	
CHAPTER III. RECURSIVE AND RELATIVE DIFFERENTIABILITY . . . . .	57
The mean value inequalities	
Doubly uniform equivalent of a relatively differentiable function	
The mean value theorem	
Taylor's theorem	
The uniform mean value theorem	
The existence of relatively differentiable functions not satisfying the uniform mean value theorem	
CHAPTER IV. THE RELATIVE INTEGRAL . . . . .	87
Ruled functions	
Relatively integrable functions	
Darboux's theorem	
Continuity of, and derivative of, the relative integral	
Substitution in the relative integral	

CHAPTER V. THE ELEMENTARY FUNCTIONS . . . . .	96
The relatively exponential, logarithmic and circular functions	
Addition formulae, relative periodicity	
Inverse functions	
CHAPTER VI. TRANSFINITE ORDINALS . . . . .	106
The relation of transfinite ordinals to the representation of numbers in a scale	
The decreasing ordinal theorem	
The use of majorant variables and a generalisation of scale representation	
The generalised ordinal theorem	
APPENDIX. RECURSIVE IRRATIONALITY AND TRANSCENDENCE . . .	123
Primitive and general recursive irrationality and transcendence	
The primitive recursive transcendence of $e$ and $\pi$	
INDEX . . . . .	137
