

# TABLE OF CONTENTS

Special Symbols and Abbreviations . . . . .	ix
Chapter I: SETS AND FUNCTIONS	
1. <i>Sets</i> . . . . .	1
2. <i>Functions</i> . . . . .	6
3. <i>Cartesian products</i> . . . . .	12
Chapter II: SPACES AND MAPS	
1. <i>Topological spaces</i> . . . . .	16
2. <i>Sets in a space</i> . . . . .	21
3. <i>Maps</i> . . . . .	27
4. <i>Subspaces</i> . . . . .	30
5. <i>Sum and product of spaces</i> . . . . .	35
6. <i>Identification and quotient spaces</i> . . . . .	42
7. <i>Homotopy and isotopy</i> . . . . .	47
Chapter III: PROPERTIES OF SPACES AND MAPS	
1. <i>Separation axioms</i> . . . . .	55
2. <i>Compactness</i> . . . . .	61
3. <i>Convergence</i> . . . . .	70
4. <i>Connectedness</i> . . . . .	76
5. <i>Pathwise connectedness</i> . . . . .	87
6. <i>Imbedding theorem</i> . . . . .	90
7. <i>Extension theorems</i> . . . . .	93
8. <i>Metrizability and metric spaces</i> . . . . .	97
9. <i>Compactification</i> . . . . .	103
10. <i>Hereditary properties</i> . . . . .	107
Chapter IV: POLYTOPES	
1. <i>Simplexes</i> . . . . .	111
2. <i>Simplicial polytopes</i> . . . . .	115
3. <i>Adjunction spaces</i> . . . . .	121
4. <i>Cellular polytopes</i> . . . . .	128
5. <i>Properties of cellular polytopes</i> . . . . .	136
6. <i>Products of cellular polytopes</i> . . . . .	143

## Chapter V: SPACES OF MAPS

1. <i>The space <math>\text{Map}(X, Y)</math></i>	150
2. <i>Admissible topologies</i>	154
3. <i>Maps on topological products</i>	158
4. <i>Injection and projections</i>	163
5. <i>Topology of uniform convergence</i>	166
6. <i>Spaces of paths and loops</i>	170

## Chapter VI: FUNDAMENTAL GROUPS

1. <i>Equivalence classes of paths</i>	175
2. <i>Groupoids</i>	179
3. <i>Fundamental groupoid</i>	184
4. <i>Induced homomorphisms</i>	189
5. <i>Fundamental groups of spheres</i>	193
6. <i>Higher homotopy groups</i>	200
