

Contents

Preface	page v
1. Line Integrals	
1. <i>Preliminary remarks about curves</i>	1
2. <i>Definition of a curvilinear integral</i>	4
3. <i>Area</i>	12
<i>Exercises</i>	20
2. Double Integrals	
1. <i>Definition of a double integral</i>	22
2. <i>Double integrals over a rectangle</i>	26
3. <i>Double integrals over normal regions</i>	31
4. <i>Green's Theorem in two dimensions</i>	36
5. <i>Change of variables</i>	41
6. <i>Transformation of double integrals</i>	49
7. <i>Improper integrals</i>	56
8. <i>Volumes</i>	62
<i>Exercises</i>	66
3. Surface Integrals	
1. <i>Preliminary remarks about surfaces</i>	68
2. <i>The area of a surface</i>	72
3. <i>Surface integrals</i>	75
<i>Exercises</i>	78
4. Volume Integrals	
1. <i>Definition of a volume integral</i>	80
2. <i>Reduction to repeated integral</i>	81
3. <i>Gauss's Theorem (divergence theorem)</i>	84
4. <i>Change of variables</i>	88
5. <i>Stokes's Theorem</i>	93
<i>Exercises</i>	96
Appendix	99
Solutions to Exercises	103
Index	106
