

# CONTENTS

	<i>Page</i>
I. SIMPLICIAL OBJECTS AND HOMOTOPY .....	1
§1. Definitions and examples .....	1
§2. Simplicial objects in categories; homology .....	3
§3. Homotopy of Kan complexes .....	5
§4. The group structures .....	9
§5. Homotopy of simplicial maps .....	12
§6. Function complexes .....	16
Bibliographical notes on chapter I .....	24
II. FIBRATIONS, POSTNIKOV SYSTEMS, AND MINIMAL COMPLEXES .....	25
§7. Kan fibrations .....	25
§8. Postnikov systems .....	31
§9. Minimal complexes .....	35
§10. Minimal fibrations .....	40
§11. Fibre products and fibre bundles .....	43
§12. Weak homotopy type .....	46
§13. The Hurewicz theorems .....	50
Bibliographical notes on chapter II .....	54
III. GEOMETRIC REALIZATION .....	55
§14. The realization .....	55
§15. Adjoint functors .....	59
§16. Comparison of simplicial sets and topological spaces .....	61
Bibliographical notes on chapter III .....	66
IV. TWISTED CARTESIAN PRODUCTS AND FIBRE BUNDLES .....	67
§17. Simplicial groups .....	67

§18. Principal fibrations and twisted Cartesian products .....	70
§19. The group of a fibre bundle .....	74
§20. Fibre bundles and twisted Cartesian products ...	80
§21. Universal bundles and classifying complexes ...	83
Bibliographical notes on chapter IV .....	92

## V. EILENBERG-MACLANE COMPLEXES AND

POSTNIKOV SYSTEMS .....	93
§22. Simplicial Abelian groups .....	93
§23. Eilenberg-MacLane complexes .....	98
§24. $K(\pi, n)$ 's and cohomology operations .....	103
§25. The $k$ -invariants of Postnikov systems .....	107
Bibliographical notes on chapter V. ....	116

## VI. LOOP GROUPS, ACYCLIC MODELS, AND TWISTED TENSOR PRODUCTS. ....

§26. Loop groups .....	118
§27. The functors $G$ , $\bar{W}$ , and $E$ .....	122
§28. Acyclic models .....	126
§29. The Eilenberg-Zilber theorem .....	129
§30. Cup, Pontryagin, and cap products; twisting cochains .....	135
§31. Brown's theorem .....	141
§32. The Serre spectral sequence .....	149
Bibliographical notes on chapter VI. ....	154

BIBLIOGRAPHY. ....	157
